LINEN

Neutrals

Neutral colours are strikingly beautiful and have the power to create a welcoming interior, as well as a sense of spaciousness.

Create a timeless look that will never go out of fashion with soft grey, bright white or classic cream.

SCARLET

Top tip:

If your room is large and/or not blessed with an abundance of light, introduce warm colours in accent pieces such as your blinds to really make a statement.

Wood Effect

Our Wood effect slats are available in 10 different tones and in a variety of larger widths.

We love wood effect as they look great alongside hardwood flooring, high wooden beams, or a stone fireplace – creating that perfect rustic interior style.

REGAL BLUE

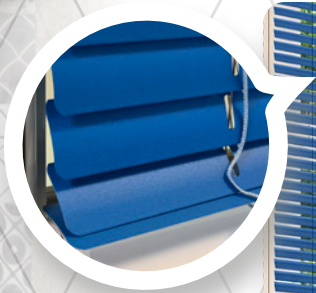

Feeling blue?

Blue is a calming, serene colour that, even in its bolder forms, is considered beneficial to the mind and body.

Deep, bold hues, such as navy and royal blue are great for evoking confidence whilst lighter shades can instil a feeling of calm and tranquillity.

Blue tones work best in bathrooms, studies, and bedrooms. It's also an ideal colour for small rooms.

Navy

OXFORD BLUE

Bring the outside in..

A positive choice of colour, Green stimulates thoughts of balance, growth and restoration.

Green mimics nature and the right shade will make a room feel like it links seamlessly to what's outside your window.

Inspirational Greys

Grey is a versatile colour which can either be soft and delicate or strong and confident. Effortlessly chic, interiors can be easily enhanced with a bold accent colour when grey is your foundation.

Thermostop

Thermostop Coating (TSC) is the latest in innovation when it comes to Venetian blinds.

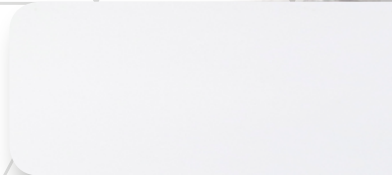

A performance slat which has the power to keep in the heat in the winter and keep out the heat of summer, promoting energy efficiency.

BACK OF TSC SLAT

How does it work?

There is a special coating on the concave side of the slat. This pre-treated coating gives emissions of heat radiation three times lower than a standard painted slat.

By simply tilting the slats so that the Thermostop coating faces inwards, heat loss is minimised during winter. In summer the slats can be reversed so that the amount of heat coming into the room is reduced - ultimately keeping your room cooler in summer, and warmer in winter.
