#### APAS ASSISTING WITH PROPANE SHORTAGE

Cool wet conditions have led to an urgent need for grain drying, leading to a surge in demand for propane. APAS has contacted the Canadian Propane Association to look at ways of speeding up propane deliveries to producers. If you know of shortages or supply issues in your area, please email us at <a href="mailto:info@apas.ca">info@apas.ca</a> with the location, supplier, and length of time for delivery. This will help the Propane Association in their efforts.

#### LIVESTOCK LOAN GUARANTEE PROGRAM

The provincial Livestock Loan Guarantee Program has been discontinued. Concerned producers have been contacting the APAS office. If you also have concerns, please contact Policy Manager Donovan Howden at <a href="mailto:dhowden@apas.ca">dhowden@apas.ca</a>.

#### TRESPASS LEGISLATION REVIEW

APAS welcomes the Saskatchewan government's review of provincial civil trespass legislation. The <u>APAS submission</u> highlighted landowners' need for greater control over who can access their land, for a number of reasons:

- The potential spread of soil borne diseases and pathogens and infectious diseases of animals
- The potential spread of invasive weeds
- Damage to agricultural property and harm to livestock by hunters and recreational users
- Illegal disposal of waste on agricultural or municipal land
- Potential risk of fire associated with unpermitted access and vehicle entry

#### NAFTA-USCMA TRADE AGREEMENT

Canada agreed to the terms of a new North American trade agreement on October 1. Full text of the agreement is available <u>HERE</u>. APAS and other farm organizations are still combing through the agreement to assess its potential impact on the agricultural sector.

# **STRYCHNINE**

The Pest Management Regulatory Agency is re-evaluating the use of Strychnine. <u>APAS</u> is partnering with other Saskatchewan farm organizations to ask for an extension of the <u>review period</u>. APAS is working through the PMRA evaluation process to ensure that producers will still be able to access Strychnine as an emergency control method for gopher populations.

# LIVESTOCK TAX DEFERRAL

The federal government has announced the list of areas that qualify for a livestock tax deferral. That list can be found HERE. APAS has asked the federal government to make the livestock tax deferral program available to all Saskatchewan producers, in light of the drought conditions that have persisted for a second year.
