Background of our company

MarCan Underwater Services is a Commercial Diving company that deals strictly in industrial maritime operations with the special needs of a technical diver. This company is operated by professional divers and, for that reason; we are able to maintain a professional attitude and appearance when dealing with our clients.

Our Commercial and Technical Diving Services include such things as underwater recovery, underwater repairs, potable water system inspections and cleanouts, barge patching, contaminated water diving, and underwater burning/welding.

With over 25 years as a centrally located inland based diving company, MarCan Underwater Services has the knowledge and skill set to get the job done faster .
