

### **Terry Lynn Fuller – Class of 1977**

“Mr. Dorch was my music teacher for six years--two years at the junior building and four years at the senior building. He had the biggest impact on me. He was more than a teacher, he helped me in so many ways. I owe him a lot, but I know I could never be able to do enough for him, so I just pass it along to the younger people. He has always been my BIGGEST Hero and I will always love him for all that he has done for me and others. He is a GREAT Man and Role model.”

### **High School Memories**

I participated in various bands ROTC Band, PT Team, chess team, and table tennis. My best memory is getting promoted to an officer in ROTC and having to get a swat with that BIG paddle with the holes in it from Sgt. Storms. My most memorable class was typing because there were only two male students in the class, Kenneth Cameron and myself.

My family lived at 6307 Agnes. My siblings also graduated from Southeast--Milton E Fuller, Harold G Fuller, Randy A Fuller, Andre L Fuller, and Charleeta D Fuller.

### **After High School**

After high school, I went to college, received an Associate's degree in accounting, but got into Information Technology. I believe in helping others, it is not about me, but about others, God will take care of me if I take care of his people.

I have tried to get and stay in contact with people but they don't wish to for some reason, I tend to believe that a lot people are still living back in the mid 70's. Back in school I was very quiet but knew a lot of people, since then, I have changed for the better and offer a voice and that seems to be a problem, but that's life.

If I had one thing to say, I would have to say that the class of "77" was and continues to be the closest and best class that Southeast has ever experienced.

“Be Blessed of the Lord and Always Look to Give and Not to Just Receive”
