

## Feel the difference?

For general health, a teaspoon taken three times a day, preferably 30 minutes before meals, reinforces the firewall in the gut; it naturally promotes the growth of good gut bacteria we need for our immune system to work as Mother Nature intended.

Most important, you can feel RESTORE working, soothing and relaxing the gut, sometimes within 20 minutes of taking the first teaspoon.

# GOOD GUT GREAT HEALTH

Your body's first line of defense.

## RESTORE<sup>™</sup> FOR HEALTH

Biomic Sciences LLC has leveraged a team of scientists with more than 50 years of research and clinical experience. Our unique dietary supplements and health products address basic health issues affecting a large percentage of the U.S. population.

## How does it work?

70% of our immune system antibody protection lies in our intestinal tract. A well-developed body of scientific research demonstrates that 20,000-30,000 different strains of good gut bacteria are required to help the immune system protect the body against the damage caused by gluten, GMOs, herbicides, antibiotics and other environmental toxins. When these toxins leak through the gut wall, they compromise the immune system's ability to work. We cannot live a healthy life without a healthy immune system.

## WELLNESS BENEFITS:

- Works to support the healthy digestion of proteins found in certain cereal grains
- Builds a firewall against toxins entering the gut wall that can lead to adverse health conditions
- Creates an environment for beneficial gut bacteria to flourish, supporting overall health and wellness

## Developed by scientists

Gut health is making big news headlines these days, with multiple studies conducted at prestigious universities underscoring the fundamental link between gut health and a host of illnesses. All these studies share a common premise: To be well, one must have a healthy gut.

We also know, based on compelling anecdotal evidence from people using RESTORE, that if we can keep the gut healthy we can block gut sensitivity to gluten and other damaging chemicals. We can address a host of gastrointestinal tract issues that wreak havoc on every system of the body.

*“It is important for people to know that RESTORE produces a medically significant outcome. My patients, who use the product every day, get better. Rather than treating specific diseases, I use RESTORE to allow our immune system to prevent them in the first place.”*
