Ghostwriting

I like to do a flat rate on books. The rate covers everything you could need. We can also talk about à la carte options.

Services I provide that are included in the package are:

Cover design : (I have an in-house artist and a couple freelance ones.)

Formatting for self-publishing. (This is a pain in the butt that you don't want to do yourself.)

Endless edits (Okay, not endless, but I want to reassure my clients that I'm here to get it right for you. Some ghostwriters limit how many edits their clients get, even if the client doesn't like the work.)

Full manuscript up to **75,000 words. Min. 20,000 words.**

Full social media blast on my Facebook, Instagram and Twitter.

Social media posts that you can use on your social media platforms with custom art.

Video calls and emails to get your story 100%.
Communication is key, I know.

Audiobook presentation of your book on my website. (Not everyone wants this, but it's a new feature I'm offering to help my authors.)

Movie trailer video to present your book to the world.

Overall, this is a package worth **\$20,000- \$30,000** if you get all of the services separately from various vendors. Since I package it all together you get a great savings.

You're getting all this value for **\$15,000 per 50,000 to 75,000 words.**
