

COMPACT 13 CLASS 5

PELLET BOILER

Pellet-burning boiler with modern design, if you would like to heat a domestic environment it provides the ideal solution. It becomes the core of the system, easy to be integrated thanks to its compact dimensions. The PELLETPOWER® innovative patented burner maintains the correct rate of oxygen keeping the efficiency of combustion stable for longer periods: keeping the burner clean means reducing cleaning time and fuel costs, and payback boiler costs over a few years. Thanks to the high efficient vertical pipes heat exchanger THERMOCORE®, and thanks to the automatic power modulation working principle, Compact performs a thermal efficiency of more than 90%. The stability of the boilers structure, the silence, the easier way to manage and clean it, and its very low emissions, make the Compact range the alternative and ecological solution to the traditional heating system.
