

## **December 2014**

The review of the Quality Improvement action plan took place this month. Plans are in place to further strengthen our links with all primary schools our children will be attending. This means we will be contacting the schools concerned in order to visit them, find out information for parents and children and provide those children who will attend, with a link book of photographs. This will be available for parents to use with their child over the summer term and help them become familiar with the school, chat about and help prepare them. This will go alongside visits. We have very strong links with the local school and have a range of activities in place to support the transition of those attending, however it is not possible for the same to be carried out for all schools but we will endeavour to have as much support in place as we can.

We are hoping to make some improvements to our garden leading up to the summer term. There are a number of items we hope will be donated. A list will be provided to parents shortly.

For further information regarding the quality improvement action plan, please see the hard copy in the parent file in the lobby.

We were inspected this month by Ofsted. The inspection was carried out over the whole day and involved parents, observations and discussions as well as documentation evidence. We will inform parents shortly of the outcome.
