IMMEDIATE DENTURES

1ST appointment:

Preliminary Impressions for custom tray or customize stock tray for master impression.

Considerations: (a) If doctor elects to extract posterior teeth, for necessary reasons, we must wait at least one to two weeks to continue to our next step.

2nd appointment:

Master impression taken after healing.

Considerations: (a) Full extension of all borders/retro molar pads, etc.

(b) Over compressed tissues.

(c) Major voids in impressions.

Assistant: Pouring impression:

(a) Rinsing impression saliva free

(b) Lightly air dry

(c) Mixing stone correctly

(d) Capturing borders, building heel of retro molar or tuberosity

(e) Invert impression onto base pad (1/4" min.)

3rd appointment:

Partial try in of teeth in wax for confirmation of vertical in the posterior area.

Considerations: (a) Identification of present positioning of patient's teeth
Prior to their removal, i.e. anteriors, ideal or characterized,
Diastemas, etc on Rx

(b) Amount of bone remaining at time of extraction

(c) Consideration of surgical sent – on Rx

4th appointment:

Delivery of a completed immediate denture. Happy Patient!

** When doctor elects to take impressions of the immediate arch and request completion of denture, we would request no extractions take place prior to delivery of denture. This will eliminate dentures that are constructed in a dimension that is inaccurate.
