

Tooth preparation

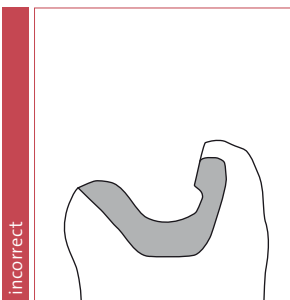

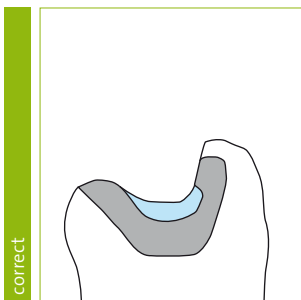

For successful results, observe the general tooth preparation guidelines below.

Also observe the additional tooth preparation guidelines, which apply specifically to 3M™ ESPE™ Lava™ Ultimate Restorative, 3M™ ESPE™ Lava™ Plus Zirconia, zircon®[®], IPS e.max® CAD, IPS Empress® CAD, VITA Mark II, VITA TriLux®, ticon®, coron® and polycon® ae – see the relevant material-specific preparation guidelines.

PREPARING THE SURFACES

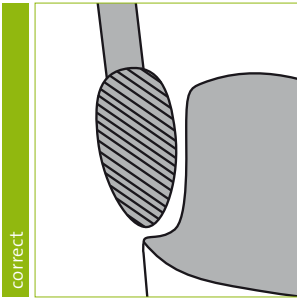

Remove sufficient hard tooth material under fissures

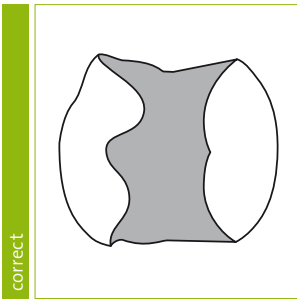

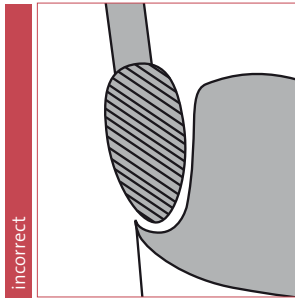

Block out with a dentine-adhesive build-up filling

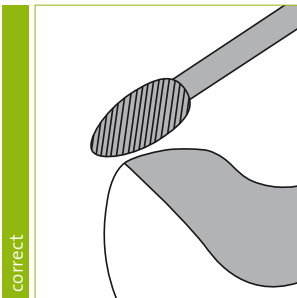

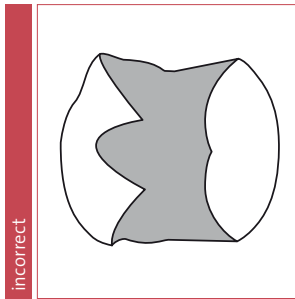

PREPARING THE MARGINS

Do not prepare in a gutter shape

Do not leave any sharp transitions

Form transitions correctly toward oral/vestibular
