Challenge. Determination. Success.

The Myth of Multitasking: Maintained in part by Employers

WHAT IS MULTITASKING

Multitasking is when a person thinks they are performing more than one executive task at the same time. Although the brain can move from task to task rapidly, it actually cannot multitask. Instead, when we think we are multitasking, we often are doing mindless tasks that do not require extensive concentration, allowing our brains to jump back and forth quickly.

HOW COME WE DO IT?

The US culture teaches us that the more productive we are, the more successful we become. We get a task completed, and it tells our brain, “Good job at being productive! Keep it up!”, leading us to believe we are efficient. Employers think this means hiring a person who can “multitask” is cost-effective.

THE TRUTH

“Multitasking reduces your efficiency and performance because your brain can only focus on one thing at a time.” – Travis Bradberry, Ph.D.

Research by Sanford University has found that doing one thing at a time is more productive than multiple.

“So maybe it's time to stop e-mailing if you're following the game on TV, and rethink singing along with the radio if you're reading the latest news online. By doing less, you might accomplish more. – Adam Gorlick

A study conducted by the University of London found that those who multitasked lowered their IQ points about 15, similar to what you could expect if someone was sleep deprived. Some men in the study dropped their IQ scores equivalent to an 8-year-old child by multitasking.

“So the next time you're writing your boss an email during a meeting, remember that your cognitive capacity is being diminished to the point that you might as well let an 8-year-old write it for you. – Travis Bradberry, Ph.D.

JOB AD FROM INDEED

Shift: 8 Hours - Day Shifts

Job Schedule: Full time

Weekly Hours: 40.00

Job Summary

The **case manager** provides case management and care coordination for designated Health Plan members. Develops a care plan that includes managing and directing members to appropriate resources, services and programs. Evaluates for comprehensive coordination of care and health services to manage members across the continuum, creates action plans for members and helps them track toward program graduation.
