

DT Anti-Aging Spray

FOR
THE FACE

IN
BLUE
OR CLEAR

DT Anti-Aging Sprays are an all-natural, antioxidant, alkaline treatment for all skin types. Daily exposure to the elements (even through windows), stress, and fatigue can weaken the cells in your skin, increase oil production, contribute to aging, and release stress hormones (like cortisol) into your body. DT Anti-Aging Sprays use antioxidants and activated ceramics to harness the power of hydrogen and oxygen to fight the havoc that life can wreak on skin. It also rehydrates skin subjected to overheated or dry air from homes, offices, and travel.

Filled with activated ceramics that harness the power of hydrogen and oxygen, our Anti-Aging Sprays are state of the art systems—naturally!

DT Anti-Aging Spray is a great way to cleanse skin after using tap water to remove traces of limestone and chlorine to soften skin. Regular use after cleansing helps you to maintain a radiant, plump, and toned complexion. Use it whenever you want to feel revitalized. It also refreshes and sets makeup to keep you looking glowing by restoring the moisture your skin is crying out for.

If you have an active lifestyle, DT Anti-Aging Spray will remove perspiration, harmful salt or chlorine, and immediately calm and rehydrate sun-burned or wind-chapped skin. It's also great chilled when you feel overheated from workouts or during the summer for an even more refreshing experience.

Dream Tree is committed to offering you a healthier way of life, so you can be assured that our range of DT Anti-Aging Sprays contain no parabens, sulfates, synthetic fragrances or dyes, petrochemicals, or phthalates—just pure, mineral, antioxidant, alkaline goodness!

Our product is naturally antibacterial and will kill up to 99% of bacteria which allows the DT Anti-Aging Spray to be used for so much more than skin care. It can aid in the healing of cuts and burns. It reduces bacteria, itching, and irritation from insect bites and stings. And a few sprays after meals or drinking acidic beverages (like coffee or soda) promotes fresher breath and rebalances your mouth's pH levels!

DT Antioxidant Cleaner can be used with tap water, but DT Alkaline Water is recommended for best results. If tap water is used, use on skin is not suggested and contact with eyes should be avoided.

DT Antioxidant Cleaner

Sweat, grime, and oil (not to mention bacteria and viruses) spread from person to person through the use of frequently touched surfaces like door knobs, kitchen counters, remotes, and phones. The DT Antioxidant Cleaner has the great benefits of the Anti-Aging Spray bottle but now with more power to tackle the needs of your busy home. This spray has an extra mineral that will help reduce radiation. In addition to this new quality, the antioxidants are much stronger—helping you clean kitchen surfaces, hydrate house plants, and improve your skin. The DT Antioxidant Cleaner comes in a larger size to help avoid constant refills and to provide a larger spray pattern for bigger areas.
