

**REFRIGERATION UK**

***First-Class Air Conditioning Solutions***  
*Design • Installation • Service •*  
*Maintenance*

# *A first-class solution specialist*

**Refrigeration U.K** is a well-established company, located in the Trafford park, manchester and working across the UK.

For more than 30 years we have provided solutions that quite simply work, supported by excellent customer service along with a strong engineering and design capability.

These are just some of the many reasons why our customers repeatedly choose to work with us as their preferred air conditioning partner.

Refrigeration U.K offer a wide range of commercial air conditioning solutions including design, installation, maintenance and repair of:

- Split, twin split, quad, heat pump systems
- VRF / VRV heat pump and heat recovery systems
- Comms room air conditioning systems
- Domestic air conditioning applications
- Vehicle air conditioning

## ***Delivering** Air Conditioning Solutions on time and within budget.*

We care passionately about the service we provide and only install the highest quality products from well-known and respected brands such as Fujitsu, Midea, Daikin and Mitsubishi Electric.

Our work extends across the North West of England, delivering commercial air conditioning solutions for a diverse range of organisations. Whether for commercial office or public sector property, school, hospital or college environment, shopping centre, hotel or domestic dwellings, we understand that our work creates an environment which is critical to the success of your businesses and home.

Our reputation is built on:

- **Listening** and **understanding** each client's precise needs
- **Advising** at the specification stage to ensure each solution performs as specified
- **Delivering** air conditioning solutions on time and within budget
- **Ensuring** that our work is thoroughly tested before 'handover'
- **Guaranteeing** our work is always conducted in a totally **safe manner**
- **Servicing** your systems to keep them running at **optimum efficiencies**
- and **always going 'the extra mile'** to ensure our customers are completely satisfied at all times.

All of our air conditioning systems are installed and maintained 24/7 by first class, 2079 City & Guilds qualified engineers, who each hold high levels of construction qualifications. All our engineers are up to date with UKATA asbestos awareness training. They are managed by a fully trained project manager.

We work with carefully selected strategic partners to ensure a UK-wide installation, repair and maintenance service.

# Simple steps to perfection

## A wide range of applications

Refrigeration U.K have many years of experience in the design, specification and installation of a variety of air conditioning applications.

Our installations range from commercial office's, public sector properties, blue chip data centers & domestic dwellings.

## Specialists in many sectors

We work within sectors such as commercial offices and new-build projects, and high-end office refurbishment projects, CAT A and CAT B site works, critical cooling data centres, retail sites, shopping centres, hotels and restaurants.

We understand each organisation's individual needs and requirements and that our work helps to create a comfortable environment, often critical to the success of their businesses.

## Free site survey and comprehensive analysis

Wherever you are in the UK, we will come to you, listen carefully to your needs and assess your air conditioning requirements.

We provide a full site survey and comprehensive analysis of the most appropriate solution, all completely free of charge and without obligation.

## ***We are fully committed to excellent customer service***

### **Fully detailed quotation**

Refrigeration U.K are project planning specialists will then provide you with a quotation for the work specified, including value-engineering options where budget is a major consideration.

We will give you a project programme schedule, which forms the basis of our commitment to you.

### **Careful planning and full project management**

All our installations are carefully project managed.

The project manager will coordinate the activities of our fully qualified installation engineers, keep you fully informed of progress and ensure any disruption to your day-to-day operations is kept to an absolute minimum.

### **Fully qualified engineers**

Friendly, fully trained and qualified engineers carry out all work.

They are installation approved and have the latest 2079 City & Guilds refrigerant handling certificates in all refrigerants including hydrocarbon. Leading to high quality, reliable solutions with excellent after-care service.

# Keeping plant operational

## Emergency 24/7/365 attendance service

We understand the importance of timely servicing and maintenance of air conditioning equipment; a breakdown can often be avoided with regular servicing. Because we understand the need for your equipment to be operational at all times, we offer an emergency 24 hours a day, 365 days a year attendance service for those times where a fast response is needed and the problem cannot wait until the following day.

Our experienced service coordinators will ensure an engineer is quickly dispatched to diagnose and resolve the problem. Please note: this service is only for customers who have a maintenance contract with us, with a guaranteed response time of six hours from notification being received\*.

## Service and maintenance contracts

We recognise the critical importance of keeping air conditioning systems in excellent working order at all times.

We offer flexible preventative maintenance contracts to keep everything running smoothly and emergency attendance if a system fails. Each maintenance contract package is tailored to your individual needs.

## Planned Preventative Maintenance (PPM)

Cutting back on maintenance can be a false economy and not a route we recommend.

A proactive approach to maintenance can significantly increase a system's life cycle. Ignoring maintenance is not only potentially against the law, equipment can become inefficient and not perform for what it was originally designed to do. Furthermore, costs could increase due to premature component failure and inefficient energy use.

We know from experience that regular planned preventative maintenance is essential to ensure efficient, trouble-free running of air conditioning equipment. We offer PPM packages to suit the needs of all customers.

**REFRIGERATION UK**

## *How we ensure a perfect result for every customer*

### **Rapid response service**

Our in-vehicle field service CRM system enables us to manage our fleet of vehicles to save time, money and reduce our carbon footprint.

The system schedules the most efficient routes from our engineers to our customer location meaning that we get to each customer swiftly and efficiently.

### **The Refrigeration U.K guarantee – 'going the extra mile'**

#### **We guarantee to always do the following:**

1. **Free site survey** – we offer free, no obligation site surveys and quotations before we start work
2. **Price competitive** – we always strive to be as competitive as possible
3. **Project engineer** – we will allocate your own account manager to handle your project
4. **Simply the best solution** – each new installation is tailored using the best and most appropriate equipment and we only use original parts when repairing equipment
5. **24 hour service** – Refrigeration U.K guarantee you quality service from our fully trained, qualified and experienced engineers on call **24/7/365** days a year.

# *The world matters to us and our customers*

## **Environmentally friendly**

All our equipment comes only from leading air conditioning manufacturers, incorporating all the very latest technology ensuring low energy consumption and ozone-friendly HVAC systems.

We stay up-to-date with legislation and ensure that all of our installations and working practices are 100% compliant.

## **Energy efficiency**

The new generation of VRF and VRV, equipment provides highly energy efficient commercial cooling and heating solutions. When combined with our tailor-made controls packages ensures a top quality energy efficient solution.

When designing systems we can select air conditioning manufacturers with the highest SCOP and EER ratings to help bring your project in line with improved efficient running costs; or points if you are obtaining a BREEAM ratings or SCAR rating on the property; or even if you are trying to improve your building's energy rating within the Energy Act legislation.

## **Decommissioning service**

Refrigeration U.K have specialists who can uninstall, decommission and remove redundant equipment and refrigerant. It is essential that this work is carried out by qualified and experienced engineers to guarantee the safe removal and disposal of the refrigerant in line with UK, European, F-Gas and REFCOM legislation. We aim to recycle up to 90% of the equipment itself, and provide full waste notes for removed plant.

## The final steps for complete customer satisfaction

### Health & safety and security

#### Health & safety and security

The company's health & safety record is exemplary and all projects are fully risk assessed before they start.

We are a certified vendor of Altius (613131) and are Alcumus SafeContractor accredited. (Y19845)

### Testing prior to handover

**Every air conditioning system installation requires careful testing before being commissioned and officially 'handed over' to the customer.**

**We always follow our comprehensive testing process, which includes the following essential checks:**

- Pre-commissioning check list
- Pipe work strength and pressure test to each manufacturer's standards
- Split, twin split, quad system, VRF, VRV Systems and CRAC specific commissioning documents.

### Instructing the use

Refrigeration U.K will carefully show the customer all the systems operating switches, devices, modes and operating remote controls.

A full run of the system will be shown to the customer and full operating manuals will be given for future reference.
