

bark!bark!

Thank you for choosing bark! bark! for your dog(s) doggie daycare and overnight needs. A cage free environment is beneficial to many dogs however, it comes with risks, as well as requirements that need to be enforced by the bark! bark! staff. Each section below must be met before your dog(s) can utilize our daycare, cage free overnight and/or deluxe private suites.

Bordetella is current as of every **6 MONTHS**

Kennel cough (Bordetella) is most commonly caused by a bacteria called Bordetella bronchiseptica which irritates the lining of the dog's trachea. This irritation causes the dog to cough and hack. Often, dogs with kennel cough will show no other signs of discomfort - they eat, play and sleep normally, except for the cough.

And yes, your dog could get kennel cough at bark!bark!. There may have been an infected dog, unknown to anyone, that acted as a source for other dogs in the daycare. We strive to avoid that situation by requiring that all dogs receive the Bordetella vaccine every 6 months.

bark!bark! strives to maintain a clean environment by using disinfectant and bleach daily. However, no matter how clean the environment, kennel cough will continue to be an issue, because it is an airborne bacteria. Please realize that kennel cough is one of the risks that you must weigh before deciding if daycare is right for you and your dog.

Rabies is current as of every 1 or 3 **YEARS** (depending on age)

Distemper (i.e. DHLPP, DAPP, DA2PP) current every **1 or 3 years**

My dog is spayed or neutered (by age of 6 months)

My dog is on a **MONTHLY** flea medication

My dog has never shown signs of aggression toward dogs and/or people.

My dog is in good health to begin attending daycare (NO vomiting, coughing, diarrhea, stitches, etc.)

My dog has no medical conditions. **(If any, you'll need a Senior/Medical Vet Release Form).**

My dog is under 10yrs old. **(If older, you'll need a Senior/Medical Vet Release Form).**

My dog is to have a collar and name tag on while attending daycare. (No harnesses, prong or chock chains) *bark!bark! advises against dogs attending daycare with valuable collars as dogs are in high interaction with other playful dogs. DOGS WITH NO COLLAR WILL NOT BE ABLE TO ENTER DAYCARE .*

Dogs **MUST** be on a leash while entering and leaving daycare facility

I have read and understand all policies for bark! bark! daycare and hotel including all fees, late charges and cancellation fees.

Dog(s) using our cage free daycare or cage free overnight must pass a FREE 4-hour temperament test (NO EXCEPTIONS). Temperament Test are scheduled Monday- Sunday between 8am-12pm by appointment only. BREED RESTRICTIONS APPLY.

Common Doggie Daycare Risks

When considering a doggie daycare facility for your furry friend, please be aware of common risks associated with numerous dogs in close proximity and or locations where illnesses are common like dog parks, city parks, walking trails, bodies of water, running water and stagnant water.

Daycare dogs are more susceptible to illnesses, especially during puppy and adolescent stages of life. They do build up immunity to these as their immune system gets stronger, but it does not guarantee that they may not be exposed to common daycare illnesses such as *Kennel Cough, Puppy Warts and Giardia*. **If your dog is showing any symptoms of these illnesses or does not seem to be feeling well in general, please do not bring them to daycare.** Thank you for your cooperation on this, as our main goal is to keep BARK! BARK! a safe and healthy place for your dogs.

Minor bumps and scratches from playing with other dogs are common at any daycare facility. bark!!bark! employees monitor all play and intervene when play escalates but does not guarantee your dog may not come home without a few play marks. We advise against sending your dog to daycare with highly expensive or valuable collars as this is a very playful environment and collars may become damaged during romping and playing!

Although bark!bark! does follow very strict daily cleaning and sanitation procedures, we cannot be held responsible should your dog contract *Kennel Cough, Puppy Warts and or Giardia*. If you would like more detailed information, we suggest you speak with your vet.

**What will my dog do during the temperament test?**

All dogs are required to be assessed for suitability in a daycare setting. Staff members will assess your dog's temperament to ensure there are no signs of aggression, can tolerate dogs of all energy levels, is not toy aggressive and is able to be reasonably controlled by staff members.

Where do the dogs go potty?

Wherever they want! Dog daycare is like an indoor dog park, there are scents everywhere no matter how rigorous we clean. Many dogs will mark their favorite spot when they walk through the door. This is natural in an environment with so many dogs. We have never heard of a situation where the dog transferred this behavior back to their home.

How do so many dogs play together and not fight?

Doggie daycare is similar to an indoor dog park BUT with constant supervision. There are three factors that make it a safer environment than you might think. First, there are no leashes. Second, the owners are not present. Many dogs behave aggressively on leash and around their owners. Third, the dogs are carefully screened prior to admittance. While there are always the scuffles that normally occur between dogs, fighting is not a regular occurrence.

Can my dog attend daycare even if their vaccination is just a teeny bit expired?

bark!bark! ensures a healthy and safe environment for all dogs in their care. At **NO TIME** may a dog enter daycare if any of the required vaccinations have expired. We want all owners to feel comfortable leaving your four-legged companion in our hands.

If my dog is vaccinated, does that mean they will never contract an illness?

No vaccine is 100% effective and some dogs can be more susceptible to infection than others. bark!bark! takes all possible precautions to eliminate the possible spread of infection in our facility. We follow a rigorous cleaning schedule on a daily basis. bark!bark! notifies all daycare customers two weeks before ANY vaccination expires. bark!bark! adheres to a strict vaccination policy and does not allow any dog to enter daycare once a vaccine has expired and will notify customers immediately of any observed signs of illness (coughing, diarrhea, worms etc.) bark!bark! maintains a healthy and clean environment for all our furry friends to play! Just as kids in human daycare, dogs can get the sniffles too. Rest assured, your furry companion will be ready to romp and play in no time.

Is doggie daycare safe for my dog?

bark!bark! employs staff members with prior dog handling experience. All daycare attendants are required to have a Dog First Aid Certification within 90 days of employment. Staff members supervise dogs at all times. bark!bark! utilizes a high staff member to dog ratio which varies dependent upon on the physical set-up, specific group of dogs at play and the experience level of the staff.

What about the little dogs?

Dogs can be separated into two playgroups based on size, play style, and age. Keep in mind that accidents and injuries can happen in all facilities. Dog daycare is like a child's playground, and by allowing dogs to play together there is a risk of injury. bark!bark! will notify owners with a report card of any noticed incidents during playtime.

Can I send bark!bark! my dogs application and vaccinations before the temp test day?

Yes, sending your application and vaccinations will speed up the check in process. It will also allow bark!bark! to review all vaccination, to ensure they are up to date. If you have expired vaccinations, we will contact you so that you may update them before your scheduled temperament test date.

Daycare Packages

5, 10 and Monthly packages are not refundable. Packages are only valid at the location the package was purchased. Packages cannot be carried over to another dog or client.
