## Why 1 STEP Cleaning FAILS

- High pressure and high temperature water, commonly used with 1 STEP Soaps can damage your truck's surface.
- 1 STEP Soaps can be highly CAUSTIC, risking damage to your vehicle, especially shiny surfaces.
- Complete road film removal is not possible without brushing, which INCREASES labor costs.
- Aluminum surfaces DO NOT CLEAN well with a 1 STEP Process
- Repeated 1 STEP Washing results in the vehicle still having a charged surface after the wash. The vehicle will still quickly attract dirt film and be more difficult to clean with each subsequent wash.

## 2 STEP Cleaning is the ANSWER

- Requires less physical labor. 2 STEP Cleaning can be performed quickly by an individual or a small team.
- Cleans road film resulting from all weather conditions and dirt types, giving 2 STEP a UNIVERSAL application nationwide with expected results.
- Cleans irregular surfaces such as tankers, livestock haulers, gravel trains, refuge vehicles, etc.
- Produces a neutralized, film free surface that guards against new film buildup longer.
- Results in a cleaner vehicle surface. Effectively cleans and BRIGHTENS aluminum surfaces.
- Environmentally friendly, resulting in a nearly neutral waste water. There is less need for waste disposal solvents or high phosphates.
- Eliminating brushing means no micro-abrasions on your painted surface resulting from 2 STEP cleaning process.

## ROAD FILM is not just DIRT.

Road film results from the build up of road dirt, diesel smoke and other foreign contaminants emitted from vehicle engines or picked up in the air.

As a vehicle travels at high speed, it generates friction and static electricity, forming an *electrostatic bond* to the pollutants.

These pollutants bond to your Fleets' surface like steel shavings to a magnet.

Call Fleetclean Systems LLC today to neutralize that magnetic bond and let those shavings fall off with FCS's 2 STEP cleaning process!

## COMMERCIAL WASH SYSTEMS

Fleetclean Systems is a true partner for its clients. We respond to your requests and customize detergent products and pressure washing systems to meet your needs. FCS keeps your vehicles, moving billboards, clean. Our goal is to minimize your cost-per-wash while attaining the Fleet goal of professionally clean and presentable vehicles traveling cross country or cross city.

## IRREGULAR SURFACES

Irregular shaped vehicles or surfaces are a challenge and cannot effectively be brushed clean. FCS's BRUSHLESS washing detergent products and high pressure wash and rinse equipment can give you the results you need.

## NORTHERN STATE CHALLENGES

Heavy dirt or winter conditions can add hundreds of pounds to a vehicle's weight. We can help you remove the snow, including all the corrosive contaminants.

## SYSTEM UPGRADES

If you have a current wash system that is failing to do the job, FCS can identify the issues and modify or upgrade your system to achieve your cleaning goals.

## Fleetclean Systems' Goal

*Provide your Team with top quality industrial detergents and equipment including:*

- FCS N37
- FCS 1B
- FCS 2
- FCS 2B
- HCS Evershine
- HCS Pro Wash
- HCS Concrete Remover
- MiTM Industrial Washers
  - Portable
  - Stationary
  - Cold Water
  - Hot Water
  - Gas Powered
  - Electric Powered

# Detergent Solutions

FCS Brushless 2-Step Wash consists of a 2 step detergent application process with a near Neutral Waste water run off solution that is safe for you, the fleet you are cleaning, and the environment.

The Detergent combination of choice of many Fleet Washing Teams utilize FCS #1B and #2B Fleet Brite Neutralizer. The combination will clean and mildly brighten aluminum rails, rims, and tanks while leaving the painted surfaces glossy and road film free. By applying our 2-Step Wash the resulting run-off will be near NEUTRAL waste water.

The following list are the most popular detergent products. Please call for our complete product line. Fleetclean Systems detergents are sold in quantities of:

- 275 Gallon Totes
  - 50 Gallon Drums
  - 5 Gallon Pails
- 
- ◇ **FCS #1B and #1B Foaming** is an aggressive cleaner to be used as the first step in the 2 Step Wash process. It brightens aluminum rails and tanks as well as working with the FCS #2B Fleet Brite Neutralizer to remove road film.
  - ◇ **FCS #2 General Truck Wash** is a highly concentrated liquid cleaning detergent especially formulated with the highest grade penetrants and surfactants to promote the rapid emulsification of dirt, grease, oil, and road film. #2 is safe to use on all surfaces and removes extremely difficult magnetic road film without brushing.
  - ◇ **FCS #2A Degreaser** is a high quality cleaning compound designed to emulsify, suspend, and remove grease and oil from most surfaces.
  - ◇ **FCS #2B Fleet Brite Neutralizer** is an aggressive alkaline truck wash that excels in removing road film, diesel smoke, and grease. Great for frame and wheel cleaner and will leave paint looking glossy when used in the 2nd Step Wash paired with FCS #1B.
  - ◇ **FCS N-37 Pre-Soak** is a low pH pre-soak that cleans and brightens aluminum. When used in a 2-step process, FCS N-37 increases the 2nd step detergent's efficiency.
  - ◇ **FCS CTC Concrete Remover** Aggressive acid cleaner effective in removing concrete slurry, splatter and residue from cement trucks, concrete handling equipment, forms and tools.
