

Circus Skills Challenge at Snowtown

Junior Primary Accounts

Tom - Yesterday we went to the circus. Clinton is a clown. He was very funny. We learnt how to juggle spinning plates and flower sticks. It was so much fun. Clinton rode a unicycle. It was so funny because he was silly.

Lara - Yesterday we went to Snowtown. We learnt how to spin plates with a stick. The flower sticks had two sticks. I could turn them around and catch them.

Banjo - Yesterday we went to the Circus Challenge at Snowtown. I loved it when Jazzy was spinning four plates around. We did some workshops. The workshops were about Flower Sticks and spinning plates. Clinton threw his equipment away

after each act. The hardest bit to learn was the flower sticks. Blyth came to the Circus Challenge. We had lunch there and recess there. At the end Clinton used my hat for a spinning plate.

Music

On the 31st of August Gaby Freer came to our school to teach music. She taught us a song on how to say hello in 5 different languages it went like this. Hey hello, bonsho guttentag, ne na mani, ne na mani, bonosteros bonosteros.

We were doing a dance for the song and we got to play the boom whackers to a song. -Matthew Burford

First Aid

Two ladies called Lorraine and Rhonda came and taught everyone about first aid.

First part there was a car crash. There were many problems going on. There were people around the car that needed to be far away from the car. The biggest problem was the car was leaking petrol and someone was smoking a cigarette. Also the dog was a big threat too.

After we had figured everything out we went on to the recovery position. We had a demonstration first in case we didn't know how to do it.

After the demonstration we went out to the well. There we went in partners. Everyone thought for their first go that it was hard. When you were the person that needed recovery it was really hard not to laugh.

After it was compressions. We went out to the well again. We went in two lines. One for the child and the other for the adult. We had to swap lines after we had done thirty compressions.

Once we had done the adult and the child we went back into the classroom to do the baby. We still did thirty compressions but we had to use two fingers because the baby's lungs aren't as big as a child's or adult's lungs. If we used both hands like we did with the others we would have put in too much air and the lungs could burst, then we wouldn't be helping the baby we would be doing much worse. - By Adelaide and Jasmine.
