Glulam and SWS T&G Decking Stain Selection Chart

Standard one coat semi-transparent oil based wood stain options shown below.

Samples are on smooth surfaced glued-laminated southern yellow pine.

Contact Structural Wood Systems for inquiries on custom finish options.

Minor blemishes and field touch-up should be anticipated on factory finishes.
Field finishing is recommended due to marring during transportation and erection.

The colors shown are for reference purposes only. They have been reproduced using digital production techniques.

These samples are from actual production, but color variation can occur due to light, age, and different textures of wood. Request an actual sample of color selection for final color approval.
