### **ATTENTION ALL MEDICAL PROVIDERS:**

As you know from reading my posts, I am dedicated to helping patients work through psychological issues. I also take an integrative approach working with the primary care provider and other healthcare providers. I am an independent psychologist practitioner who is licensed in Oregon, Missouri, the United Kingdom and, through interstate agreements, able to provide services elsewhere. If your clinic or practice would like to offer my services to your patients, and handle billing for services provided through telepsychology/telehealth, I would be willing to arrange to contract with your clinic to provide those services through your clinic. Like others who are in self-imposed isolation during the COVID-19 pandemic, I am trying to find a way of providing services to patients who can not afford "fee-for-services," while at the same time help support my family. If you are interested in working out an arrangement, please let me know so we can provide services to these patients in need. I can be contacted at [drory@live.com](mailto:drory@live.com) or leave a message at 417-766-0381. I would be willing to agree to 80% of received payments to provide this service.
