Crystals are used to enable energy healing. Crystals can move, absorb, focus and diffuse healing energy and vibrations within the body of a client. This, in turn, enhances the self-healing ability of the client. Illness can occur when the individual is misaligned with the divine energy that is 'the foundation of all creation'.

Crystal therapy is an ancient healing system concerned with treating patients holistically through the precise placement of crystals on the body and the surrounding room.

## ABOUT THE COURSE

Unlike Western healthcare (which tends to focus on treating one symptom/ailment at a time) crystal therapy addresses the patient as a whole - paying as much attention to their spiritual and emotional well-being as to their physical health.

There is very little scientific evidence to support the effectiveness of crystal healing on a medical level. However, crystals have been used, revered and enjoyed for many thousands of years - both for their aesthetic beauty and for the peace, relaxation and harmony they seem to invoke.

You can train as an animal crystal therapist with us and provide this wonderful healing
