- View live temperature from your home on your smart phone
- Uses mesh communication for multi zone control
- Compact size - 85mm x 85mm x 15mm and requires a minimum electrical box depth of 25mm
- Volt free contacts

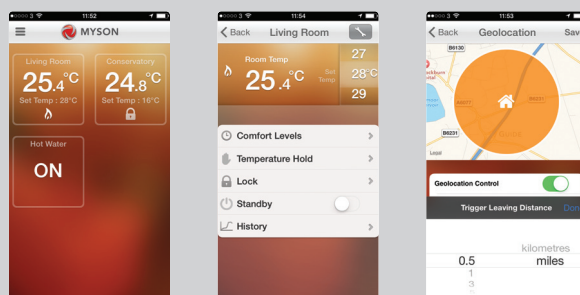

MYSON TOUCH2 WIFI

The 'App' controlled room thermostat uses its own hub, which means no fixed ip address or Dynamic DNS service provider is required, making the initial set up simple. The app allows you to control & view your heating from any location via your smart phone or tablet, in addition the Geo Location feature will turn your heating off or down when you leave home & back on or up when you return. The distance can be set by you and referred to as the 'target distance'. The 'Geo Location' is smart, so it can easily cope with multi occupancy (smart phones) of any home by means of 'personalised area zones'.

Note, the minimum system requirement is one T2AHWIFI, with up to a maximum of 31 additional wifi thermostats (T2WIFI), one of which can set to control your hot water.

Download the **MYSON TOUCH2** app for iphone, Android and Windows phones www.myson.co.uk
