Posted: 11 May 2020

CIP plant.

Specs

2 channels preferred, but single channel would be OK.

3 tanks (1000 to 2000 liters) Caustic/Acid/Re-Use.

1 smaller (500 liters) fresh water rinse tank.

Product lines are 2" diameter.

Tank sizes to be cleaned include 30,000-liter raw milk and raw egg silos, 5000-liter finished product tanks (6 off to be cleaned individually or in pairs)

Maximum length of product lines is approximately 30 meters
