Subject: Re MPS

I am writing a testimonial for the MPS system that Travis created
I purchased a sidewinder and found out after that the sled was so hard to steer that I was ready to get rid of the machine
I went on a 300 mile trip through mostly twisted Trails
My shoulders after the ride felt they were dislocated - it was that bad!!!!
I came across Travis website regarding this MPS system
I purchased it with great reluctance and apprehension
I thought how could this work like I read on the website
I have to tell you
As soon as we put the system on the sidewinder
The sled handled effortlessly around the corner like a red hot knife through butter!!!!
I now love the machine for the handling and power That the SW has
I will definitely be telling all my friends with sore shoulders about this
Travis You smashed this one out of the ball park!!!!
Thank you
