First-Class Refrigeration Solutions
Design • Installation • Service •
Maintenance

A first-class solution specialist

Refrigeration U.K is a well-established company, located in Trafford Park, Manchester and working across the UK.

We are focused on providing excellent customer service along with a strong engineering and design capability.

These are just some of the many reasons why our customers have repeatedly chosen to work with us and chosen us as their preferred refrigeration partner.

We offer a wide range of commercial refrigeration solutions including design, installation, maintenance and repair of:

- Walk-in Coldrooms & Freezer Rooms
- Cellar Cooling applications
- Restaurant & Bar Chillers
- Catering Chillers
- Production Rooms
- Flower Coldrooms
- Beer & Wine Rooms
- Ice machines
- Bespoke refrigeration units.

Refrigeration U.K deliver innovative, practical and reliable solutions, which fulfil our customers' needs.

We care passionately about the service we provide and we only install the highest quality products from well-known and respected brands to ensure that our installations work to their optimum efficiencies.

Our specialist team of engineers and project managers provide a range of tailored refrigeration solutions to customers across the UK delivering design, installation, and planned preventative maintenance service on all refrigeration applications.

Our reputation is built on:

- **Listening** and **understanding** each client's precise needs
- **Advising** at the specification stage to ensure each solution performs as specified
- **Delivering** refrigeration solutions on time and within budget
- **Ensuring** that our work is thoroughly tested before 'handover'
- **Guaranteeing** our work is always conducted in a totally **safe manner**
- **Servicing** your systems to keep them running at **optimum efficiencies**
- and **always going 'the extra mile'** to ensure our customers are completely satisfied at all times.

All of our refrigeration systems are installed and maintained **24/7** by first class, 2079 City & Guilds qualified engineers, who each hold high levels of construction qualifications. All our engineers are up to date with UKATA asbestos awareness training. They are managed by a fully trained project manager.

We work with carefully selected strategic partners to ensure a UK-wide installation, repair and maintenance service.

Simple steps to perfection

A wide range of applications

At Refrigeration U.K we have considerable experience in the design, specification, installation and servicing of all aspects of refrigeration equipment used by the retail sector to food production and high-end kitchens.

Specialists in many sectors

We work with sectors such as fast food outlets, hotels, pubs, restaurants, convenience stores, schools and public sector properties.

We understand each customer's individual needs and that our solution is often critical to the success of their business. Our engineers carry a wide range of parts on their vehicles and work hard to fix a problem on the first visit.

Free site survey and comprehensive analysis

Wherever you are in the UK, we will come to you, listen carefully to your needs and assess your refrigeration requirements.

We provide a full site survey and comprehensive analysis of the most appropriate solution, all completely free of charge and without obligation.

*We are fully committed
to excellent customer service*

Fully detailed quotation

Refrigeration U.K are project planning specialists and will provide you with a quotation for the work specified, including value-engineering options where budget is a major consideration.

We will give you a project programme schedule, which forms the basis of our commitment to you.

Careful planning and full project management

All of our installations are carefully project managed.

The project manager will coordinate the activities of our fully qualified installation engineers, keep you fully informed of progress and ensure any disruption to your day-to-day operations is kept to an absolute minimum.

Fully qualified engineers

Friendly, fully trained and qualified engineers carry out all work.

They are installation approved and have the latest 2079 City & Guilds refrigerant handling certificates in all refrigerants including hydrocarbon. Leading to high quality, reliable solutions with excellent after-care service.

Our service is second to none

Emergency 24/7/365 attendance service

We understand the importance of timely servicing and maintenance of refrigeration equipment; a breakdown can often be avoided with regular servicing. Because we understand the need for your equipment to be operational at all times, we offer an emergency 24 hours a day, 365 days a year attendance service for those times where a fast response is needed and the problem cannot wait until the following day.

Our experienced service coordinators will ensure an engineer is quickly despatched to diagnose and resolve the problem. Please note: this service is only for customers who have a maintenance contract with us, with a guaranteed response time of six hours from notification being received*.

Service and maintenance contracts

We recognise the critical importance of keeping refrigeration equipment in excellent working order at all times.

We offer flexible preventative maintenance contracts to keep everything running smoothly and emergency attendance if a system fails. Each maintenance contract package is tailored to your individual needs.

Planned Preventative Maintenance (PPM)

Cutting back on maintenance can be a false economy and not a route we recommend.

A proactive approach to maintenance can significantly increase a system's life cycle. Ignoring maintenance is not only potentially against the law, equipment can become inefficient and not perform for what it was originally designed to do. Furthermore, costs could increase due to premature component failure and inefficient energy use. We know from experience that regular planned preventative maintenance (PPM) is essential to ensure efficient, trouble-free running of refrigeration equipment and we offer PPM packages to suit the needs of all customers' needs.

REFRIGERATION UK

How we ensure a perfect result for every customer

Rapid response service

We at Refrigeration U.K are committed to attend the customers emergency call as soon as possible 24 hours a day 365 days a year.

Our engineers are able to locate and call the customer with a time of arrival. this enables the customer to know when the engineer will be attending.

The Refrigeration U.K guarantee – ‘going the extra mile’

We guarantee to always do the following:

1. **Free site survey** – we offer free, no obligation site surveys and quotations before we start work.
2. **Price competitive** – we always strive to be as competitive as possible.
3. **Project engineer** – we will allocate your own project manager to look after your equipment.
4. **Simply the best solution** – each new installation is tailored using the best and most appropriate equipment and we only use original parts when repairing equipment.
5. **24 hour service** – Refrigeration U.K guarantee you quality service from our fully trained, qualified and experienced engineers on call **24/7/365** days a year.

Flexible maintenance contracts, keep everything
running smoothly

Installed to high standards

Health & safety and security

The company's health & safety record is exemplary and all projects are fully risk assessed before they start.

We are a certified vendor of Altius (613131) and are Alcumus SafeContractor accredited. (YI9845)

Testing prior to handover

Every new installation is fully tested before being commissioned and officially 'handed over' to the customer.

We always follow our comprehensive testing process, which includes the following essential checks:

- Pre-commissioning check list
- Pipe work strength and pressure test to each manufacturer's standards
- Refrigeration applications specific commissioning documents.

The world matters to us and our customers

Energy efficiency

Refrigeration U.K ensure your solution uses energy efficient units, which will provide excellent functionality. We also will maintain the systems to keep them running at their optimum efficiency for as long as possible.

Environmentally friendly

All our equipment comes only from leading refrigeration equipment manufacturers, incorporating all the very latest technology ensuring low energy consumption, ozone-friendly cooling systems.

We stay up-to-date with legislation and ensure that all of our installations, servicing and working practices are 100% compliant. We take environmental issues relating to refrigeration gases and products very responsibly and always ensure that every installation is fully compliant to all regulations governing the use and disposal of refrigeration products.

Decommissioning service

Refrigeration U.K have specialists who can uninstall, decommission and remove redundant equipment and refrigerant. It is essential that this work is carried out by qualified and experienced engineers to guarantee the safe removal and disposal of the refrigerant in line with UK, European, F-Gas and REFCOM legislation.

We aim to recycle up to 90% of the equipment itself, and provide full waste notes for removed plant.

Our customers
told us...

“
*Second to none from
the beginning..*”

We have been working with BETTAVEG from the start of opening our business. Complete full turn key projects. Including building a full operational prep area, holding rooms and large pallet coldstores. We maintain all BETTAVEG's refrigeration on yearly maintenance packages to give peace of mind whilst they operate their day to day business.

'We have been doing business with Justin since he started Refrigeration U.K & the service has been second to none from the beginning. We can rely on Refrigeration U.K for anything, from installing a socket to installing a warehouse coldstore. Any job is carried out in a timely and cost efficient manner'

Georgia O'Sullivan
Director of BETTAVEG, New Smithfield Mkt,
Manchester.

“
*Nothing is too much
trouble...*”

Since Italian Grill has been in business we at Refrigeration U.K have been repairing, servicing and planning many aspects of refrigeration requirements for the restaurant. Including catering refrigeration, bar refrigeration and air conditioning throughout.

'Refrigeration U.K have given us an excellent professional service, always attending to breakdowns in a timely manner. Refrigeration U.K always give expert advice before and after service which has saved us money and the life of our refrigeration equipment within the restaurant. Nothing is too much trouble, in my opinion the best there is!'

Mike Love
Owner & Head Chef of ITALIAN GRILL,
Stalybridge, Cheshire.

professional service...
