THE PHARMA ROOM: SURFACE WASH TECHNICAL INFORMATION SHEET

THE PHARMA ROOM: SURFACE WASH CLO2

The Pharma Room: SURFACE WASH is a food ready Chlorine Dioxide based Sanitizer that fully complies with FDA guidance. The Pharma Room: SURFACE WASH is produced through a proprietary process that allows no free chlorine in the finished product and has a mid-low pH profile. The Pharma Room: SURFACE WASH is an oxidizer and does not form harmful byproducts, kills life proteins of pathogenic organisms and is immune to pathogenic mutation. The shelf life for our product is 4 – 8 months or longer depending on storage conditions.

Applications

- Hard surface disinfectant for food processing
- Odor control, all applications including medical
- Poultry cold dip process and most other food processing
- Membrane removal for a variety of food industries
- Bottle rinsing

Agriculture – Processing and also on-site
 Dairy process and teat dip
 Legionella control
