

We are on information overload aren't we?

I want to thank all of you for doing your part to flatten the curve. We can see evidence that it is working as long as we stay diligent.

A notice from the Ashcroft Medical Clinic about their services during this time. See page 2.

We will not have monthly meetings until it is recommended by our Provincial Medical Health Officer to carry on.

The leadership in our Province to date has been amazing, ready, helpful, calming and cautious.

In This Issue

- Thanks to the
- essential service workers
- Health care workers
- Support workers at the health site
- The Emergency Department is still open weekends.

ASHCROFT PATIENT CARE DURING COVID-19

Dear Patients,

Your health is our #1 concern.

To protect you from COVID-19, you can now see your doctor and clinic care providers by video and telephone.

This allows you to get care while social distancing or quarantined.

After your video or phone assessment, if you need to be seen in person, we will make arrangements to do so safely.

To sign up for a video or telephone appointment, please call: **250-453-9353**

Before your appointment, please see this website for tips on preparing to use video or telephone for clinic visits: tinyurl.com/VirtualCareFAQ.

PLEASE NOTE: WE ARE ACCEPTING PATIENTS!!!

We would like to introduce Dr. Stephen Akinkunmi as the newest member to our Ashcroft Team. He brings with him a wealth of over 15 years experience practising in Nigeria and Ontario, supplemented by specialized training in Women's Health.

He enjoys the uniqueness of rural practice and is excited to join our community with his wife, a certified clinical laboratory technologist, and his two children. Call for an appointment!!!
