

Contraction Match

First of all you need a list of all different contractions. You could ask your child to write these out to help:

Have not - Haven't

Can not- Can't

Should not- Shouldn't

We will- We'll

Are not- Aren't

How many more can you think of?

Chop off the contracted words and hide them around.

The child has to search for the matching contraction and they are only allowed to bring back the one they have been sent for.

Time how long it takes to retrieve each answer.

Which one is the quickest time?

What is your combined time?

Can you beat it another day?
