

Who is PIHG?

We are a producer owned co-operative that was founded in 1999 in Dauphin, MB, where we are still located today, by farmers from the Parkland area interested in making the hemp industry thrive here! Today we primarily do two things:

1. We run an Industrial Hemp breeding program to supply farmers with high-quality, pure genetics in the form of Certified Seed.
2. We market our members' hemp grain for them to ensure they have access to the best markets and to give local consumers access to our proudly grown Canadian Hemp grain.

Certified Seed

For almost two decades, PIHG has been supplying Certified Industrial Hemp Seed to farmers in the Parkland area and beyond. Since 2002 we have registered 10 new varieties of Industrial Hemp with the Canadian Seed Growers Association following their strict guidelines for seed breeding and production. We continue to produce our Certified Seed following CSGA rules and regulations.

Our Certified Seed can be shipped (domestically and internationally) in 50 lb bags, 2000 lb totes or can be picked up in bulk in Grandview, MB. Call or email us today to place your order!
