

FANTSUAM FOUNDATION NOW & IN THE FUTURE

As is shown by the timeline below, Fantsuam's range of services has grown organically in response to community needs. We will continue to deepen our activities to include appropriate and supporting services whilst aiming to develop the expertise to replicate the model throughout other states in Nigeria and beyond.

Fantsuam's GAIYA volunteering program has been pivotal to the effective development of Fantsuam's integrated service delivery model.

INTEGRATED PROGRAMMES

Having an integrated suite of programmes is crucial to the effectiveness of Fantsuam Foundation in eliminating poverty and disadvantage. Our combined focus on Sustainable Livelihoods, Health and Education has evolved from Fantsuam's ability to recognise and respond to the needs of its beneficiary communities.

Close to 4,500 individuals benefit from Fantsuam's services every year and we recently estimated that over 100,000 people will have benefited either directly or indirectly from Fantsuam Foundation's activities since it was established in Bayan Loco in 2001.

Fantsuam Foundation is located in Bayan Loco, a peri-urban slum of Kafanchan, Kaduna State, but our activities and our vision extend beyond Kafanchan toward the whole of Kaduna State. There are a number of development challenges faced by residents of Kaduna State, the priority being the reduction of poverty. The lack of jobs and income infrastructure including safe housing has also contributed to the poor health sector, and many residents do not have access to affordable and good health care facilities or services.

PROGRAMME HIGHLIGHTS

- GAIYA – trains 1,000 extension workers, students and other individuals in community volunteering every year
- MICROFINANCE – disburses over N80 million in micro-loans to over 3,000 local women every year
- FANTSUAM ACADEMY – trains over 500 young people and professionals in computer-related courses every year
- ZITNET – provides internet access and wireless hotspot access across Kafanchan and beyond using appropriate power and ICTs for the developing world.
- FAMILY HEALTH CLINIC – provides treatment and maternity services to almost 1,000 members of the local community every year
- HIV/AIDS – provides counseling, testing, home based care and family support services for over 500 children, adults and the elderly living with and affected by HIV/AIDS

SOCIAL ENTERPRISE

Fantsuam is committed to the practice of social business: both for the sustainability of the communities it serves and for its own long term future. Currently revenue from Fantsuam's three social businesses: Microfinance, ZittNet (internet service provider) and Fantsuam Academy (ICT training) cover 64% of the organisation's annual costs making it less reliant on external funders for its sustainability. Donors can be confident that Fantsuam Foundation can harness any contributions for long term benefit.

The development of social businesses will continue to be a key strategic objective of Fantsuam Foundation in its fight against poverty and disadvantage
