This individual is a client of Downtown Counseling Services, where we are providing mental health care for children, adolescents, individuals, and couples. We are providing telehealth for as many of our clients as we can from our home or office. We have moved a significant amount of services to be cloud based in a very short time span.

Some of our counselors are seeing clients in person based on each individual's diagnosis, severity of their mental health needs, or other unique considerations. Please recognize this letter as statement of this client's essential need to continue their mental health services at this time.

Sincerely,

Lori T. Candrian, M.S., LPC
