Combine the incredible energies tuning forks and crystals to produce a frequency of Angels & Crystals.

Angels radiate electromagnetic energy that also vibrates to different frequencies.

People sometimes choose crystals, sound, and colour that correspond to the energy frequencies of certain types of angels, attracting them with specific types of energy and perceive angelic messages more clearly than they could otherwise.

There is a metaphysical system of identifying angels according to light rays of seven different colours that correspond to different energy frequencies.

The light waves for the seven angel colours vibrate at different electromagnetic energy frequencies in the universe, attracting the angels that have similar kinds of energy.
