**6<sup>th</sup>/7<sup>th</sup>/8<sup>th</sup>:** The new quarter finds both sixth and eighth grade studying on the early English colonies, while the seventh grade is getting ready to start learning about early Greek civilizations. In science, students are learning about the relationship between weather and atmospheric conditions and building on our knowledge of waves to understand how sound works. I hope students have a good start on their dioramas. As the new quarter begins, I want to remind the students' that the book report format continues, and one oral book report is still required based on one of the written book reports. Three written book reports will be required for this quarter, so I hope to communicate that pacing will be very important. I look forward to seeing all the parents at conferences on Thursday.
