Happy Birthday to:

- Claymar- Mar 7*
- Aaron - Mar 8*
- Nyaniang - Mar 9*
- Shambhavi - Mar 10*
- Solenne - Mar 21*
- Jeffrey- Mar 24*

HAPPY
St. PATRICK'S
DAY

Dear parents and families,

We understand that you may have questions about the Novel Coronavirus. We would like you to know that we are putting in place a number of proactive measures to protect the children and staff well-being.

Cleaning - Our Centre has been proactive in ordering additional supplies, anticipating the need for hand sanitizer, and increased use of hand soap and paper towels in support of handwashing.

Handwashing - As always, the best precautions people can take is to wash hands, avoid touching your face, and cover your mouth if you cough to reduce the spread of germs.

Symptoms for the novel coronavirus have included:

- Fever
- Cough
- Difficulty breathing

The virus is spread through close contact (within 2 meters) with an infected person. It is transmitted person-to-person by the inhalation of droplets from the infected persons cough or sneeze. Infants and children should stay home if they are sick. Parents should call their health care professionals if they

have any concerns or if the child present the above mentioned symptoms.

March is here!

Welcome to the month of March, the days are now noticeably longer and brighter!

We are happy to welcome new children and families in our center, thank you for being part of our big family.

Reminder for Parents

As we know this is season for new registration for 2020-21 educational calendar.

Have you registered your children for kindergarten in your neighborhood community school?

Activities

During the month of March our children will explore nature more, they will go for neighborhood walks, play outside in the playground with snow, and make snowman, an igloo with the snow. They will also experience the melting snow.

Children will be busy painting pots of gold for leprechaun, clover, shamrock, veggies and fruits,

They will also plant seeds for the outside garden. They will water their plants and observe them growing
