

Stay on the right track

Introducer Kits from Typenex® Medical come in various lengths and sizes to assist with efficient vascular access. Featuring a needle, wire guide, sheath, and dilator, the all-in-one system helps administer smooth entry. With multiple options, you have the flexibility to choose the kit that works for you.

Introducer Kits

Features and Benefits

Efficient Design - The innovative all-in-one system streamlines steps and minimizes inventory.

Multiple Sizes - Explore various kits to accommodate different kinds of procedures, preferences, and patients.

Maximum Flow - We have hemoostasis valve adapter options to help minimize blood loss during the introduction of the catheter or device into the vasculature.

Includes Necessary Tools - All kits come with a 21 G x 7 cm non-echogenic needle and either a stainless steel or nitinol wire guide.
