

JKL Industrial Services Limited

Specialists in Sheet Metal Engineering

Canalside Close, Goscote, Walsall, WS3 1NZ. Tel 01922 409 949 Fax 01922 710 457

Manufacturers of Industrial Ovens, Air Handling Units and Ventilation Equipment, Dust and Fume Extraction Plant and Equipment.

Manufacturing

Modern Machinery

Our machinery is some of the best available and we are constantly investing in the latest products and equipment on the market to ensure all our processes remain as effective and efficient and up to date as possible.

Manufacturing Software

We use complex and detailed software for our machinery and computer's which allows us to meet specifications to very fine detail and design highly specialized products. If you can draw it we can make it!

Experienced and Skilled Workforce

With many of our workforce having over 25 years' experience in the trade we certainly have the knowledge and experience to handle the most complex of jobs.

Our employees often give advice and consultations to our clients and customers on complex issues and help them to come up with the most efficient and cost effective designs.

Investment & Training

We see the importance of continuously investing in our employees. It's vital for the future that we continue to re- invest and train our staff to be the very best in the industry. We have recently designed an apprenticeship programme to help bring young talent into the company and support our organic growth model.

"I believe that our continued success is due to our philosophy to be the very best in what we do.

We want is to provide our customers with the best possible service and products so they can succeed. We are constantly attracting new customers and we have had some of the same customers for years. The relationships we have built together means they always know they will be looked after every time and get the very best quality and innovation from JKL."

Ken Woolley
(Managing Director)

Product Range

Industrial Ovens

Our factories has the capacity to manufacture industrial ovens either as a whole unit or as flat pack form using interlocking type or bolted construction. We manufacture any sizes from small box ovens, to industrial well ovens, or large curing/drying ovens.

Light/Heavy Duty Ductwork

Our company has many years' experience in the manufacture of duct work systems, heating and ventilation, and dust & fume extraction to any given dimensions/ specifications. Fully welded systems or lock form construction. Available in most materials including mild steel, stainless steel or aluminium. Ducting can also be produced to DW144 specifications.

Air Handling Units

We have the capacity to manufacture air-conditioning units/ air replacement plant to any given design specification. We have facilities that allow us to manufacture units as large as can be transported on the UK road network.

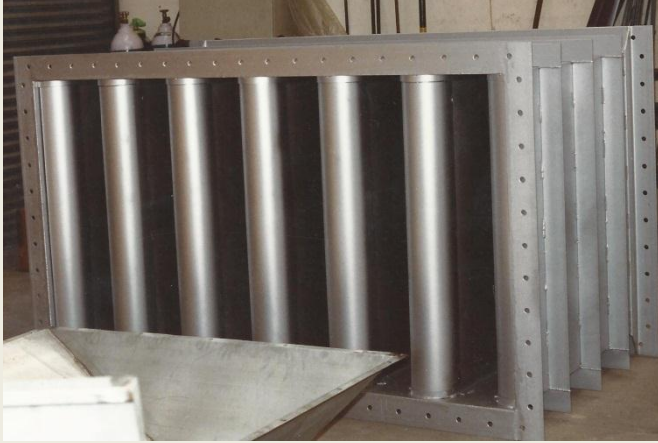

Furnaces

We have experience in the manufacturing of industrial furnaces up to the highest of temperatures in stainless steel and mild steel materials.

Tanks

JKL has the experience in the manufacture of tanks of all sizes and in most materials complete with lip extraction systems if required. We can also offer rubber lined tanks. Tanks can be produced whole or sectional (site welding if required)
