QUALITY
FOOTCARE
PRODUCTS

ABOUT US AND OUR MISSION

Quality FootCare Products has been supplying podiatry and chiropody professionals since 1995. We are proud to say that QFC may be the best resource for equipment, instruments and general quality supplies for the podiatric industry. With competitive pricing and attentive personalized service.

Our promise to you is to provide quality products at fair and reasonable prices. Our goal is to find ways to save you money without compromising on quality. We promise to do that by processing and shipping your orders accurately and efficiently. Lastly but certainly not least - we promise to keep current with the newest products available and dedicate ourselves to the satisfaction of you, our customers.

How to order

We make it easy for you to order.

You may order by fax, email or phone. We even provide a \$2 discount on most emailed or faxed orders. If you are new to us, we would request that you pay your first order by credit card. (Hospitals, Family Health Teams and many organizations are exempt from this - please call if you have any questions.) Once established you will be entitled to thirty days free credit - pay after you have received your orders. In most cases product returns or exchanges require only a phone call or email to let us know what you might be returning. We request that instruments be wrapped so that they are protected during transit. Should any of our products require attention at any time, please call us at 1-866-833-9352 or email us at quality@qfootcare.com.

We do have just the one small retail location - but we will do everything we can to make sure your order is delivered safely to your door. We do have a showroom where we are able to display equipment - please call for an appointment if you are interested.

FAQ: free shipping, minimum orders, etc.

We provide free shipping on most orders over \$100. Most orders under \$100 are charged a small shipping and handling charge of \$10 or slightly more for heavy, bulky or difficult to ship orders. Back-orders are almost always shipped free of charge. We request that you try to meet our minimum order of \$50, but in urgent situations please call and we will see what is possible.

The majority of our orders are shipped the day after they are placed by expedited parcel post. Delivery varies from one to five business days. You can visit www.canadapost.ca for more details.

If you require more urgent delivery, please inform us of your needs when you place the order. Expedited parcel is not a guaranteed service.

If you are not 100% happy with your order, please contact us.

PRICE MATCHING - In those rare occasions our prices are not the lowest we will endeavour to match whatever deal you have found. There are some exclusions and exceptions.

How to return goods

At Quality FootCare, we make it easy for you to return products.

The most important information we need is your invoice number and what you are requesting (replacement, credit, refund, etc. included with your return). The pdf file (Return Merchandise Form) that can be found on our website makes it very easy to return merchandise without the bother of getting an RMA or RGA number. Used instruments must be cleaned and sterilized before return.

Leasing

- 100% financing
- No annual review or audits
- Doesn't affect credit lines
- Payment is fixed
- Easy to budget and plan for the future
- Conserves cash for operating costs
- Pay as you profit from equipment
- Some Leases are tax deductible
- User friendly, personalized service
- Early purchase options available
- Flexible to meet your needs
- Fast credit turnaround
- Faster tax write off possible

Borrowing

- Various user fees charged
- Down payments common
- Floating rates
- Premiums charged to lock
- Affects credit lines
- Reduces borrowing power
- Subject to annual review
- Maintenance fees charged
- Credit turnaround slower
- Fees raise effective rates
- Less customer service oriented
- Less flexibility in terms

An investment in quality

A guide entitled, "Recommended Procedures for Care, Maintenance and Sterilization of QFC Surgical Instruments" is available on page 68.

All QFC instruments are supplied non-sterile unless specified otherwise. When you purchase QFC instruments, you are investing in quality products. Care and maintenance will prolong their lives and afford the user with many years of trouble free service.

After removing from packaging, QFC instruments should be cleaned and sterilized before use.

During cleaning and sterilization cycles do not mix dissimilar metal instruments. Keep stainless steel/chromium-plated/silver-plated instruments etc. separate and do not process in the same cycle; otherwise corrosion or staining may occur on the stainless steel instruments.

In all procedures, ensure that the instruments are in their unlocked, open positions and that the joints are exposed to the cleaning/sterilizing processes. If instruments are locked during sterilizing, stresses in the joints will be produced which will eventually weaken the joints and lead to fracture.

Fully Automatic Autoclaves ALL YOU DO IS SET IT AND WALK AWAY!

**EZ9 plus and EZ11 plus feature computer download record-keeping
(USB and network ports)**

EZ9 plus

Chamber Dimensions
9" x 18"

Chamber Volume
5gal - 19L

With the simplicity of one touch design all your sterilization and drying needs are fulfilled. The Tuttnauer EZ9 & EZ11 plus fully automatic autoclaves will fill, sterilize, exhaust and dry at the touch of a button.

- Closed door active drying system to maintain sterility and ensure efficient drying of packs and pouches.
- High efficiency air pump circulates hot air after the sterilization cycle for automatic fast drying.
- Optional internal printer for convenient, comprehensive documentation.
- Pre-loaded automatic cycles match your sterilization needs.
- 2 year parts and labour manufacturer warranty.

EZ 11 plus

Chamber Dimensions
10" x 19"

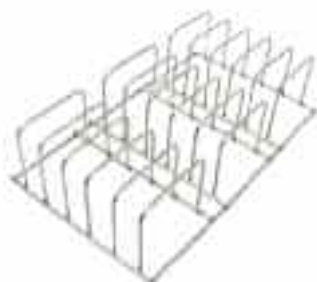

Chamber Volume
6gal - 23L

EZ - Filter

Hepa Filter
for EZ Autoclave

EZ - Paper

Thermal Chart
Recording Paper
5/box **\$28.50**

Sterilization/Drying Racks

Fits EZ9 and EZ10, for proper
sterilization and drying of
pouched instruments. **\$56.00**

Manufacturer warranty

Standard manufacturer warranties are applicable. Maintenance and service is the responsibility of the purchaser.

Valueklave 1730

- Fast Cycle Time (11 minutes from a hot start) (Standard unwrapped cycle time).

Chamber Dimensions
7" x 13"

Chamber Volume
2.5gal - 7.5 L

When you require instruments that are "sterile to the point of use" - the Elara delivers!

Elara 11 Class B Autoclave

The Elara 11 is designed for sterilization of wrapped, porous and hollow loads.

- Short cycle and high volume pre and post vacuum pump for perfect class B sterilization results
- 316L grade stainless steel chamber and door with electro-polish finish
- A built-in steam generator provides steam and facilitates a standby steam mode
- The door closes smoothly and locks automatically

Chamber Dimensions
11" x 20"

Chamber Volume
7.5gal - 28.5L

Water Distiller

Tuttnauer offers a distiller that provides pure water that is 99% free of total dissolved solids. These distillers eliminate the inconvenience and expense of buying bottled water. Their ease of operation makes them ideal for any medical, dental or laboratory application.

- Automatic Shut-Off
- Stainless Steel
- Non Aluminum Condenser

Manufacturer warranty

Standard manufacturer warranties are applicable. Maintenance and service is the responsibility of the purchaser.

When STERILE "to the point of use" matters...

Chamber Brite

Effectively cleans and descales the chamber reservoir and tubing of most steam autoclaves.

- **CB0010** (10/bx) **\$68.00**

- Pre-measured packs
- No pre-mixing required
- Usage promotes efficiency
- Easy to store and odour-free

Bravo - Class B Sterilizer

The Autoclave of the Future!

- Fast cycle times
- Fractionated vacuum system
- Closed door drying with Dri-TecV technology
- Easy to use – single button operation
- Conforms to international and national standards
- Integrated printer option
- Patented door locking mechanism and steam generation system
- 17 or 21L chamber capacity
- 120V or 220V options

The Bravo is a fractionated vacuum sterilizer that incorporates both pre-vac (to remove air) and post-vac (to help drying) cycles to ensure perfect steam penetration for any load. Bravo is true to the STATIM reputation for speed, providing rapid cycles for instruments.

Cassette Sterilizers

Statim 2000 G4

- Automatically records and monitors every cycle 24/7
- WIFI enabled
- 12 minute Dri-TecS drying technology
- Internal water filtration system allows for tap water
- RFID seal technology
- Easy serviceability

Statim 5000 G4

- Ultra-fast 9 minute unwrapped cycle
- 17.5 minute wrapped cycle
- Exceptional instrument turnover
- 15 minute Dri-Tec^R Drying Technology
- Single use water
- Aseptic transfer of instruments
- Reduced instrument investment
- Prolongs instrument life

M9D-022 (manual autoclave)

Compact, reliable autoclave from Midmark Ritter
9 x 15 Chamber Manual Door
Chamber size, 13.25 litres
Unit weight 73 lb or 33.1 kg

M9: Similar as above with automatic door

M9 printer can be added to either M9D or M9

Manufacturer warranty

Standard manufacturer warranties are applicable. Maintenance and service is the responsibility of the purchaser.

Instrument Washers

This powerful countertop washer is your first step to effective sterilization. If it's not clean, it can't be sterilized.

Capacity and Cycle

- Touchscreen display
- 10-cassette (8" x 11") capacity
- 4-cassette (8" x 11") capacity
- Easily configured for loose instruments and various cassette sizes
- Fast wash cycle and efficient water use

Mechanical and Construction

- Active drying system consisting of heater and blower dries instruments rapidly and prevents corrosion
- Stainless steel 304 construction
- Integrated liquid chemical dosing system assures accuracy, minimizes user intervention and requires no additional cabinet space
- Printer or datalogger (optional)

Chemical Indicators

Chemical Integrators

STEAMPlus is an immediate readout Class 5 device approved for use in all steam cycles. This four inch strip has distinct pass/fail criteria and is cleared by the FDA as equivalent in performance to a biological indicator. This technology offers the highest level of sterility assurance in the form of a chemical indicator, but does not replace the routine use of a biological indicator.

SSI-100 (box of 100) **\$49.00**

SSI-1000 (box of 1000) **\$290.00**

Lantor Cube® Bowie-Dick Test

Test Packs should be used daily with dynamic air removal steam sterilizers (for example, Bravo or Elara sterilizers) to detect air leaks and ineffective air removal. Both reusable and disposable formats are available. Pack 25/pk, Latex Free - **LCR-025**
\$148.00 per 30

Indicator Tape

Indicator tapes provide immediate identification of processed items while it also serves as a closure to seal sterilization packs. Colour change indicator verifies exposure to sterilization process. Tapes are individually packaged in 60 yard rolls and available in multiple widths. Tapes are available in both regular and latex/lead free versions.

Tape Dispenser
TD001 \$48.00

Chemical Indicator Pen Professional Choice

To identify and monitor items that are steam processed. Ink changes from black to red when processed. Works on non-porous surfaces (metal, glass).

SIP-001 \$29.00

Steam Indicator Tape roll

1/2" - **ST-072**

\$6.00

3/4" - **ST-048**

\$7.00

Chemical Indicator Strips

Each chemical indicator (CI) strip provides distinct colour change when exposed to the sterilization process. An internal CI should be used within each package or tray to be sterilized. Four inch strip can be written on and kept as a permanent record. Eight inch strip can be used as is, or torn in half at the perforation for smaller packs. (250/bx)
4": **SIS-250 \$24.50** 8": **SIL-250 \$31.50**

Sterilization best practice quick guide (Canada)

Each Load

CSR Sterilization Wrap

- Highest BFE (bacterial filtration efficiency) available*
- Highly permeable (no wet packs)
- Made from environmentally-friendly cellulose
- Exceptional tensile strength (wet or dry)
- Use with EtO or steam sterilization processes
- Recommended use of two layers folded sequentially

*Data on File

Sure-Check™ Type 4 Sterilization Pouches

Built-in multi-parameter internal/external process indicators that change color when all three criteria for sterilization have been met – time, temperature and steam.

STEAMPlus™ Sterilizer Test Pack (one time per load)

PCD with Type 5

Allows users to immediately release non-implant loads with peace of mind from the STEAMPlus™ Sterilization Integrator, which is attached to a load record card.

STEAMPlus™ Type 5 Integrators (one time per pack)

Type 5

Allow users to immediately release non-implant loads with peace of mind from the STEAMPlus™ Sterilization Integrator.

Each Day

SporView™ Plus Biological Indicator Test Pack

PCD with BI + Type 5

Allows users to immediately release non-implant loads with peace of mind from the SporView™ Plus Sterilization Integrator, which is attached to a load record card.

SporView™ Self-Contained Biological Indicator

An in-office biological indicator (BI) system certified for use with all steam sterilization cycles.

This system gives clear, easy to interpret results for monitoring the effectiveness of the sterilization process.

Biological indicator results are known after 24 hours incubation in any compatible dry block incubator operating at 55°C to 60°C.

AirView™ II Bowie-Dick Test Pack (for pre-vac sterilizers)

- Designed to detect the presence of air in prevacuum steam sterilizers
- Available in single-use
- Easy-to-interpret indicator sheet
- Ink will not fade after sterilization
- ISO 11140-5 Type 2 Compliant

Implant loads must be held until BI results are known.

Nipper Replacement Programme

Learn how you can upgrade old, worn instruments to new at a much lower cost than new. Applies to all brands of instruments but there are a few conditions. Savings range between 30 & 33 percent.

Multi Radiance Lasers

550 Quad Power Podiatry Wound Care Table

All new MTI 550 Podiatry and Wound Care is ADA compliant in all base versions (standard, swivel or mobile) using the transfer support, providing easy patient ingress/egress and equal access for patients and caregivers with disabilities. All 550 Procedure chairs come equipped with Smart Tech, a computerized computer controller that enhances safety, reduces energy consumption and provides smoother movement, additional memory options and more user preferences.

- Ultra quiet 24-volt low voltage DC electric gear motors
- 25" width of table
- foot control (home button ADA compliant)
- 725 patient load capacity
- 4 dynamic user programmable positions
- All steel frame and cushion substrates
- Smooth Velcro®-attached upholstery in standard foams
- Tapered backrest
- Legrest with 7" power foot extension
- Headrest: rectangular non-articulating

Removable Leg Wrapping Support

Avoid health care professional injury by using MTI's patent pending leg wrapping support. The patent pending leg wrapping support is a dual function support providing a calf support for wrapping the foot/heel and a heel support for wrapping the rest of the leg.

The removable leg wrapping support is

made from aluminum for a light-weight yet very strong support and is non-porous coated for ease in cleaning and disinfecting. The support can easily be moved to either the patient's left or right hand side of the foot section for ease of wrapping either leg or heel.

527WP Tri Power Programmable Bariatric Podiatry Chair

Features a full 30" width and a low ADA compliant 19" entry height provides easy patient entry. Two user programmable positions assure rapid movement to often used positions. Positions from upright to contour, flat, and trendelenburg are easily attained with the power lift, back, and tilt functions of the MTI 527WP Bariatric Podiatry Chair.

**800 lb.
Capacity**

Cover for MTI
Foot Control
Available

527S Tri Power Non-Programmable Podiatry Chair

Features a full 24" (61 cm) width and a low ADA compliant 19" (48.3 cm) entry height provides easy patient entry. A rapid position switch which operates the lift up and tilt simultaneously assures rapid movement to an optimal patient position. Positions from upright to contour, flat, and trendelenburg are easily attained with the power lift, back, and tilt functions.

- Ultra quiet 24-volt low voltage DC electric gear motors
- 24" (61 cm) maximum width of table
- 10 1/8" x 14 1/2" x 2 1/2" (25.7cm x 36.8cm x 6.4cm) stainless steel debris extends a full 12" (30.5cm) using KTL Cataphoresis coated slides
- Footrest extension adjustment with dual locks are located on both sides at the end of the footrest
- All steel frame and cushion substrates
 - Designer Velcro®-attached upholstery in standard foams (optional memory foams and Ultraleather™ styles available)
 - Choice of foot control or remote hand control with auto return, stop/cancel, and any button cancellation
 - Rapid position switch powers the lift up and tilt up at the same time when the switch is held down, providing your desired position quickly and efficiently

Also available is the 527P Fully Programmable Podiatry Chair.

MTI provides two different types of upholstery: Premium and Ultraleather.

If one of our standard choices doesn't fit your office décor, contact us for non-standard colour charts for a larger variety of colors or send us your own fabric to match the décor of your office.

SG Series Hand Operated Pneumatic Chair

Pneumatically adjust the seat height for your most comfortable working height quickly and easily using the hand lever. Dual wheel casters maneuver quietly and smoothly over all types of surfaces and without damaging or marring the floor. Soft and supportive seat with MTI physician/assistant seating.

- Hand lever actuates gas spring
- Five-caster black composite base
- Two options for height adjustments
- 16.5" (41.9 cm) round deep padded seat
- Optional ergonomic backrest
- Dual wheel casters or glides

Accessories Available

(Split Leg)**
Model **93CDT**

The 93CDT two and three motor chairs are our most popular with all the features of the robust 93CD plus the added benefit of trendelenburg seat tilt (greatly enhancing patient comfort and allowing the foot end to rise to a full 153cm (60") for unrivalled access for heelwork or for operating when standing up). New feature: legs fold to 90 degrees.

Features: outstanding frame guarantee, low running costs, easy operation, high density fire retardant foam, hardwearing anti-microbial vinyl, removable fold back arm rests, divided legs, extending & removable heel pads, able to lift 225kg from its lowest height.

Operator stools

Our stools feature ergonomically contoured upholstery and backs adjustable for height and tilt. The Deluxe version offers a full syncro mechanism with seat tilt and improved comfort. The Wheely Stool has a comfortable 41cm diameter seat and an easy to use gas lift. Features: fire retardant vinyl, 64cm 5 castor base for maximum stability, gas lift.

Mayo-Type Instrument Table

features an improved design with stainless steel tray, double posts and steel crossbar for added strength plus deluxe casters

- Chrome plated steel tubing
- Height adjusts from 33.5" to 56" (85.1 cm to 142.2 cm)
- Tray size: 12.5" x 19" (31.8 cm x 48.3 cm) **\$175.00**

Gordobalm 4oz. Pleasant aromatic scent that is an excellent adjunct to sports medicine therapy and regular professional care. **GL1046-2 \$12.00**

Gormel Ten Lotion Treats very dry skin conditions. Acts as a hydrating agent and helps restore damaged skin with 10% urea. **GL6000-8 \$16.00**

Gordofilm for the topical management and removal of common and plantar warts. **GL3009-1 \$17.00**

Calicylic Creme 4oz. Softens and moisturizes dry, scaly skin. Greaseless and nonstaining. **GL1012-2 \$24.00**

Gormel Creme 4oz. Moisturizes and softens dry, cracked, calloused, rough and hardened skin of feet, hands or elbows. **GL3001-3 \$23.00**

Sorbidon Hydrate softens and restores moisture to dry, cracked, calloused skin, and leaves a film on skin for added protection. **GL2070-4 \$19.25**

Emolia Lotion Elegant hand and body lotion to soften and moisturize dry skin. (8oz) **GL2004-8 \$17.50**

Gordon's No. Five spray foot powder's unique action helps stop perspiration and odour, and relieves hot, tired feet. **GL1017-4 \$15.00**

Mycomist Fungicidal, sanitizing deodorant spray for shoes and boots. **GL1090-4 \$17.00**

Foot Balm Diabetic for very dry, sensitive skin, with 10% urea

Intensive care for very dry, rough and sensitive skin. A special combination of active substances with 10 % urea supplies the skin with moisture; supports natural skin functions and prevents dehydration. Especially suitable for diabetics.

CAM8008.2 \$13.50

Foot Deo Balm against foot odour, long-lasting

A mild concentrated cream that deodorises and acts against foot perspiration, burning feet, soreness and itching between the toes. The special ingredient aluminium chlorohydrate protects against foot odour by preventing the bacterial decomposition of body perspiration. With mild ingredients, Foot Deo Balm offers dependable, long-lasting care and relief for sore feet too.

CAM8018.2 \$13.00

Fresh sensitive for dry and sensitive skin

(150 ml Bottle)

In addition to the FRESHUP complex, includes 5% urea to balance moisture loss and soften the skin. In addition, to caring for sensitive skin, the anti-inflammatory and conditioning active ingredients of echium oil and cardiospermum are used. This renders the foam especially suitable for dry, sensitive skin, e.g. that of diabetics.

CAM8055 \$15.90

Fresh Hydro for very dry skin
(150 ml Bottle)

In addition to the FRESHUP complex, includes 10% urea, balances moisture loss, softens the skin, makes it elastic and more resistant. For the care of very dry skin, aloe vera gel is included.

CAM8056 \$15.90

FRESHUP Complex

FRESHUP complex found in all fresh foam products- Camomile oil combined with bisabolol, glycerine, pathenol and grape-seed oil to care for and protect foot skin. Lemon grass and fruity oils provide a gentle scent.

Fresh Intense for cracks and calluses

(150 ml Bottle)

Intensely caring balm with FRESHUP complex, 15% urea and shea butter. Callus formation is reduced by regular use and cracked, rough skin areas prevented. Non greasy, quickly absorbed, and protects the skin against drying out.

CAM8057 \$16.80

Fissure Cream for rough and cracked skin areas

- smoothes extremely dry and flaked skin areas specifically on the elbows, hands and feet.
- stores moisture in deeper tissue layers
- soothes sensitive skin
- supports natural skin functions
- reduces callus
- supports regeneration of the skin
- nourishes skin to render it soft and smooth

CAM8080.2 \$12.50

**FUDE Foam -
protect and care sensitive skin against fungus**
100 ml Bottle

The foam is quickly absorbed and doesn't leave a greasy film behind. Skin stays healthy, elastic and retains its natural protective qualities.

Application
Shake well before use.
Hold upside-down for application
CAM8071 \$16.00

**FUDES Solution -
protect and care skin,
toenails and fingernails**
20 ml Bottle with glass pipette

A combination of antibacterial substances, benzoic acid, usnic acid and the antimycotic properties of undecylenic acid provide skin and nails with long-lasting protection against fungal attack.

The anti-inflammatory properties of bisabolol, the high quality active ingredients extracted from the witch hazel together with the proven effect of panthenol combine to protect and care for skin, toenails and fingernails. Regular application protects against fungal infection.
CAM8077 \$12.00

**FUDES Spray - care and hygiene
with fungal protection**
100 ml Bottle

Antibacterial ingredients and alcohol disinfect and cleanse. Chamomile, gromwell root and the Asian marsh pennywort provide effective care for the sensitive between-toe zones where the skin is vulnerable and often subject to irritation. Antimicrobial and fungicidal properties derive from undecylenic acid and usnic acid (obtained from beard moss).

CAM8079 \$18.00

**Callus Pro-spray for
professional use only**

Even faster and more effective with 20% urea and chamomile extract. Spray directly onto the callus and allow to act for 1 - 2 minutes. The callus is then easily mechanically removed with all common instruments. After callus removal, coat the skin well with nourishing balm to prevent reformation of callus.

CAM9115.1 - 50ml spray bottle **\$9.00**
CAM9115 - 200ml spray bottle **\$22.00**
CAM9115N - 1000ml refill **\$62.00**

Dormer 211

When you need a proven moisturizing solution that does not rely on urea.

Dorm C211T - 110ml tube **\$14.50**
Dorm FC211L - Face cream 70ml **\$12.50**
Dorm HE211 - HyperEmollient 75g **\$14.00**
Dorm L211L - Lotion 200 gm **\$17.00**

**Callus Balm reduces callus,
with 15% urea**

100 ml Bottle
Easy to apply formulation with 15% urea

- intensive care of callused skin
- reduces callus
- protects against drying out
- absorbs quickly

CAM8011.2 \$13.50

Summit Dopplers

Summit Doppler Systems offer great sensitivity, high fidelity sound and the latest technology. These are the best Doppler systems Summit ever designed... and they have been designing Dopplers for over thirty years. Performance-Reliability-Service. All Summit products are backed with the highest standard of support and service.

L450A Package

L250AC Package

The LifeDop ABI System features a portable bi-directional Doppler with compact printer for the diagnosis of Peripheral Arterial Disease (P.A.D.) The system includes Doppler, printer, adhesive-backed label paper, bi-directional probe, ABI charts, forms, ABI video, examination guide, quick reference guide and ABI glossary, with 4 cuffs and aneroid package.

The system includes:

- Compact bi-directional hand-held Doppler - auto-calibrated
- Modular printer with adhesive-backed label paper
- Automatic waveform scaling with fast printout
- 8MHz bi-directional probe
- 4 cuffs and Aneroid (10 & 12cm)
- ABI Chart
- Report forms (pack of 50)
- ABI Video, Examination Guide, Quick Reference Guide, and ABI Glossary
- ICD9 Code listing

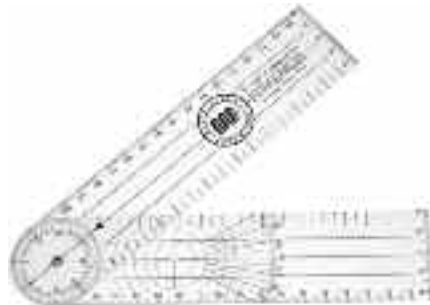

VANMAX New from Summit Doppler
The Vantage ABI..... Simplifying the diagnosis of P.A.D.
The true one-button ABI system that performs the ABI exam in **as little as three minutes**. Now, diagnosing Peripheral Arterial Disease for the 8-12 million Americans affected can be done fast and accurately.
The Vantage ABI uses an innovative cuff-based technology for performing the ankle-brachial index (ABI) exam to assist in the diagnosis of peripheral arterial disease (P.A.D.).
The system provides accurate determination of the ABI across the full range of P.A.D. The technology, developed by Summit Doppler, was co-invented in cooperation with researchers from the Cleveland Clinic. It uses DFO waveform analysis, a significant improvement in ankle pressure determination and peripheral arterial disease assessment over traditional forms of oscillometric ankle pressure estimation.

Stein's
The authority in podiatric padding and supplies since 1929.

Volare Adhesive Corn Pads

- Fine quality polymeric white foam
- Latex-free, non-toxic and hypo-allergenic
- Excellent cushioning for sensitive areas without bulk
- The most advanced concept in podiatry
- Super adhesive backing

 C-1 (500 Pack) - **765-1050 \$109.00**

 W-7 (500 Pack) - **765-1053 \$109.00**

Why Use Rolls?

- Attention to quality - Only the highest grade materials and adhesive
- Added flexibility - Can be cut into any size or shape for a customized fit
- For further customization - Most rolls can be skived
- Large selection - Available in many widths, lengths and thicknesses
- Most rolls are color coded for easy thickness identification: Pink - 1/8", White - 1/4", Flesh - 1/16" and 3/16"

Adhesive Wool Felt

Lifetime Guarantee

At Quality FootCare, we maintain a simple philosophy, “we like happy customers”. This is why all QFC reusable surgical instruments are covered by our unrivalled lifetime guarantee.

Should any of our reusable instruments crack, bend, deform, corrode or fail while being used for its intended purpose, we will simply replace it with a new one or repair it free of charge. This guarantee applies throughout the working life of our instrument.

We do not require any purchase order numbers, copies of invoices or other proofs of purchase. The QFC brand on the product acts as your guarantee. All we ask is that the instrument is cared for and not abused. Our guarantee does not cover wear and tear. Please refer to our recommended procedures for care, maintenance and sterilization of QFC surgical instruments on page 68.

Should any of our products require attention at any time, please call us at 1-866-833-9352 or email us at quality@qfootcare.com.

Single Use Instruments - FAQ

How do I know if a device is for single-use?

It will have this symbol on the packaging or the device:

What does single-use mean?

Do not reuse. A single-use device is used on an individual patient during a single procedure and then discarded. It is not intended to be reprocessed and used again, even on the same patient.

Is single-patient use the same as single-use?

No. Single-patient use means the medical device may be used for more than one episode of use on one patient only; the device may undergo some form of reprocessing between each use.

Why shouldn't they be reused?

Serious incidents relating to reuse of single-use devices have occurred.

Reuse can be unsafe because of risk of:

- cross-infection – inability to clean and decontaminate due to design.
- endotoxin reaction – excessive bacterial breakdown products, which cannot be adequately removed by cleaning.
- patient injury – device failure from reprocessing or reuse because of fatigue, material alteration and embrittlement.
- chemical burns or sensitisation – residues from chemical decontamination agents on materials that can absorb chemicals.

Also, if you reuse a single-use device you may be legally liable for the safe performance of the device.

Can I sterilise a single-use device?

A few single-use devices are marketed as non-sterile. These may require processing, in line with the manufacturer's instructions, to make them sterile and ready for use.

You must not resterilise or reuse them.

The Story behind DMI Single Use Instruments

DMI has a Class 7 medical grade cleanroom, used for the packing of single use stainless steel medical instruments. Built and operated in accordance with the strict protocols and methods necessary to create and maintain a highly controlled environment, the cleanroom is microbiologically tested every three months and fully validated every year.

DMI recently expanded the business with significant investment in its own on-site Ethylene Oxide (EtO) sterilising chamber. EtO sterilisation is ideal for disposable products because it safely sterilises delicate devices that cannot support conventional high temperature steam sterilisation, working at a low temperature but with high efficacy.

All Susol instruments available

Susol Podiatry Nail Care Set
- sold individually or in cases of ten

SU-P02 - **\$12.75** per pack
or **\$127.50** per case of 10
plus shipping

Shipping of single use podiatry packs

Single use sets are one of the few products we charge a delivery cost. Most orders of other products ship for free when the order reaches \$100. We subsidize the cost so you pay less than the actual cost we are charged and it becomes a better value for you on larger orders. For example, ten sets ship for \$10 and 100 sets ship for \$30.00.

Personal Single Patient Use is a VERY different category of instruments than single use instruments. Please contact us for more information.

Personal Single Patient Use

(Some examples shown below)

Personal patient nail care products from QFC are a low cost, yet good quality range of instruments, designed for single patient use, as an alternative to professional reusable or single use instruments. Using personal single patient nail care products will help to protect your patients from infections borne from cross contamination. With simple care instructions, patients take their instruments home and bring them back for each appointment.

We recommend you first check what professional guidelines and health authority rules are in place that might govern the use of personal single patient use instruments before purchasing. Best practises regarding cleaning, sterilization and protecting your patients are constantly evolving.

Our nail cutters offer similar levels of quality that you would expect from QFC, but are made from lower specification steel as they are not designed for repeated autoclaving. Please note that due to their intended use, all personal nail care products are excluded from our lifetime guarantee.

Q007

5.0" blacks file

Personal single patient options

(Four popular options)

All four sets are available at the same price of \$35.00 plus shipping. Unlike single use instruments, they are not sterilized and are not shipped in sterile packaging.

SPU Pack C comes with a 5.5 inch curved jaw nail cutter, single-ended blacks file and diamond foot dresser
SPU Pack S comes with a 5.5 inch straight jaw nail cutter, single-ended blacks file and diamond foot dresser

SPU Pack C5 comes with a smaller 5.0 inch curved jaw nail cutter, single-ended blacks file and diamond foot dresser
SPU Pack S5 comes with a smaller 5.0 inch straight jaw nail cutter, single-ended blacks file and diamond foot dresser

Personal single patient use instruments are available individually and packages can be design for you with other instruments (at different prices).

Tourni-cot rings make it simple and easy to occlude vessels during digit surgery. Rolling the elastic ring onto the digit squeezes blood from the field. Once in place, the ring applies reliable pressure to act as an exsanguinating tourniquet. Apply after anesthetizing the digit, and remove by cutting the ring at its notch.

Recommended Procedures for Care, Maintenance and Sterilization of QFC Surgical Instruments

Unless alternative instructions are supplied with individual products, these instructions apply. All QFC instruments are supplied non-sterile unless specified otherwise. The use of all QFC instruments should be limited to qualified personnel. An investment in quality - When you purchase QFC instruments, you are investing in quality products. Care and maintenance will prolong their lives and afford the user with many years of trouble free service. Please follow the care and maintenance guide. A guide to the most common problems associated with instruments and their solutions is detailed for your reference.

Care before cleaning and Sterilization

After removing from packaging, QFC instruments should be cleaned and sterilized before use.

During cleaning and sterilization cycles do not mix dissimilar metal instruments. Keep stainless steel/ chromium plated/ silver plated instruments etc. separate and do not process in the same cycle; otherwise corrosion or staining may occur on the stainless steel instruments.

At all times ensure any solutions/compounds that are used to clean/sterilize the instruments are neutral pH7. If low pH solutions are used they will cause black staining and high pH solutions will cause brown staining on the surface and in the joints of the instruments. If solutions do need to be used which are not neutral pH7, they must be thoroughly washed off afterwards by liberal amounts of demineralized water.

In all procedures, ensure that the instruments are in their unlocked, open positions and that the joints are exposed to the cleaning/sterilizing processes. If instruments are locked during sterilizing, stresses in the joints will be produced which will eventually weaken the joints and lead to fracture.

The majority of QFC instruments that contain joints or metal-to-metal contact (e.g. scissor blades) are supplied pre-lubricated. We recommend after removal from packaging the instruments are rinsed and cleaned prior to sterilization.

We do not recommend "WD40" or other industrial lubricants for our instruments. A specially formulated lubricant, (Instrument Lube MIL3-700), is available from QFC that is excellent for surgical instruments lubrication.

Rinsing

After removal from packaging or immediately after use, the instruments should be washed/rinsed with warm running water. Care should be taken to remove all traces of blood, saliva, mucous, saline solutions or foreign debris, especially from serrations and joints. Nylon bristled brushes or cotton wool may be used to aid this process. Under no circumstances must iron wool, iron bristled brushes or abrasives be used.

The instruments should then be cleaned – see "cleaning" and then thoroughly dried. At this stage the instruments should be carefully inspected to ensure that their working parts and function are not impaired.

Any instruments that have joints or have metal-

to-metal contact should then be lubricated with instrument lubricants and stored in a clean and dry environment.

Cleaning

Hand washing is recommended, especially for Micro, Ophthalmic and delicate instruments. If machine washing or chemical cleaners are to be used, the manufacturers instructions should be followed.

Ultrasonic cleaning

Ultrasonic cleaning is permissible (if instruments contain plastic components, check individual instructions supplied with instruments to confirm permissibility). After ultrasonic cleaning, the cleaning solution should be washed away by rinsing in demineralized water. The instruments should then be thoroughly dried and lubricated. We recommend Micro, Ophthalmic and delicate instruments are not ultrasonically cleaned as ultrasonic cleaning could impair the delicate cutting edges and tips of the instruments. Change ultrasonic solution regularly as recommended by solution manufacturer.

Disinfection

We do not recommend this form of cleaning. However, if no other option exists, it may be performed under strict guidelines. Disinfection may be performed by immersion or by washer sterilizers. Manufacturers instructions on concentrations of solutions and processing times should be strictly adhered to. After disinfection, wash thoroughly with sterilized water, dry the instruments.

Some disinfectants will cause corrosion to stainless steels. Allow minimum immersion time of instruments in solution as recommended by disinfectant manufacturer.

Change disinfection solution regularly and where recommended use corrosion inhibitors.

Caution Cleaning, rinsing, disinfection, and boiling render instruments "clean". They do not make instruments sterile.

Sterilization

Unless specified otherwise with instructions for individual products; sterilization may be performed by autoclaving, dry heat, flash autoclaving, gamma irradiation, cold sterilization or

ethylene oxide.

We do not recommend "Glass Bead" sterilization – a process in which only the front, working end of the instrument is inserted into a heated vat of glass/silica beads. As this process may not destroy any migrating spores or bacteria which may be at other parts on the instrument away from the working end. This form of sterilization may also lead to instrument discolouration and early fracture – due to variable temperature gradient from the front to the back of the instrument.

Some instruments cannot be sterilized by all of the above processes. Consult individual instructions supplied with instruments that indicate suitable sterilization method. Do not allow temperature of sterilizers/ autoclaves to exceed 180 degrees centigrade, otherwise, the instruments may be discoloured or their strength (temper) may be impaired.

IMPORTANT - Always sterilize instruments in their open positions.

Disengage all ratchets (locks) and ensure sufficient surface of the joints is exposed to allow the sterilizing medium access to the surfaces hidden under the joints (box locks for example). If instruments are sterilized in a process where heat is involved and the instruments are left in their locked positions, the joints will crack.

After sterilization the instruments should be allowed to cool and fully air dry before use.

Whichever process is used, adhere strictly to manufacturers sterilization instructions. Wherever water is used in sterilization procedures, e.g. in "steam autoclaving", we recommend salt free demineralized water is used instead of tap water. *Caution* For dry heat (hot air) sterilization we recommend paraffin oil is used to lubricate the joints and ratchets of instruments before sterilization.

Caution Avoid the contact of your surgical instruments with the following materials as these materials will cause discolouration/corrosion that could lead to failure.

Abrasives, Aluminium chloride, Barium chloride, Betadine solutions, Bleaches, Bromine, Iodine, Mercury or its compounds, Peroxides, Potassium chloride, or any liquids, compounds which produce volatile/corrosive vapours.

Always be gentle and treat your instruments with care.

QUALITY
FOOTCARE
PRODUCTS

Quality FootCare Products
508 Newbold Street
in London, ON
N6E 1K6

**(north-west corner of
Newbold and Consortium)**

We strive to maintain normal showroom
hours 9:00 to 5:00, Monday to Friday.

However, to avoid disappointment, we suggest
that you call ahead to set up an appointment
when you can receive the undivided attention
of one of our staff.
