Pro Tips

Intense Brightening Exfoliating Powder

Brightening Boost: Mix powder with the Illuma Intense Lightening Serum and a few drops of water. Work mixture onto the skin and leave treatment on as a masque for 10 minutes.

Gentle Lip Buff: Mix powder with the Ormedic Balancing Lip Enhancement Complex. Massage onto lip area. Gently remove with water.

Brightening Pre-Cleanse: Mix powder with the Illuma Intense Lightening Cleanser. This cleanse includes an exfoliation with a little more 'grit' and enzymes while adding additional brightening.

Cleanser Boost: Pair powder with ANY cleanser for added exfoliation and a smoother, brighter skin tone.

Enzyme Power Masque: Mix powder with the Vital C Hydrating Enzyme Masque for dull, dehydrated skin. This will add increased circulation while lightening and brightening.

Extraction Aid: Enzymes in the powder are a sebum softener. Add a small amount of powder with an equal amount of water into a measuring cup. Whip with a fan brush. Apply to face and steam for 5 minutes. Remove with water and start extractions.

Body and Intimate Area Lightening: A great exfoliation and skin lightener for those concerned with pigmentation on underarms, bikini area, etc.

Travel Pal: This product can be packed in a carry on or for lightweight travel as it is a powder.
