Design & Analysis, Service Re-design, Discrete Event Simulation, Informatics, Data Visualisation, Cost Modelling, Strategic Planning and Management, R, SAS,

Eren Demir, Ph.D.

Eren has a Ph.D. in Decision Sciences. He is a healthcare modelling specialist who combines the expertise in strategic consulting and advanced analytics which offer decision makers powerful tools to appreciate the complexity of their system and understand its inner working, i.e., "tools for thinking". So, it gives the opportunity to evaluate the implications of possible policies before the actions are implemented in the real world, hence avoiding the trap of "doing things and hoping for the best".

Eren has lead and completed many consultancy/research projects, including capacity planning; predicting patients at risk of readmission; forecasting demand and cost; re-design of services to improve clinical outcomes; data mining to capture hidden patterns and trends; simulation of patient pathways; evaluation of service outcomes, and development of models to measure cost effectiveness.

Specialties: Healthcare consultancy, Statistics, Big Data, Predictive Modelling, HES, Health Intelligence, Decision Support Tools, Outcomes Evaluation, Service Re-design, Pharma, Pharmaceutical, Discrete Event Simulation, Informatics, Data Visualisation, Cost Modelling, SUS, SPSS, R, SAS, Management Science
