

I 'm a Breast Cancer Survivor

Loretta Dorsey a 9 year breast cancer survivor. When I was diagnosed in July {2002}.I thought I was going to die, I didn't have anyone to talk who knew what I was going through. If you haven't went through the battle of a breast cancer patient you can't understand

what that person is dealing with. I had no one to talk to, yes my family was there, but they didn't understand what was happening to me.

My treatments consisted of a lumpectomy and I had eight lymph nodes removed, none of them were detected for cancer. Thank you Jesus!

I had to do six rounds of chemotherapy for twice a week on Monday and Thursday. After the chemotherapy was over, I started eight weeks of radiation everyday for 15 minutes a day.

We had no history of breast cancer in my family I have 7 sisters and I was the first one to get the disease. I learned that being a breast cancer patient doesn't mean your life is over, it just means you have add a new chapter in your life that you have accomplished and completed. God blessed me to go through this trial of life to come out with a wonderful testimony. Thank You God for the testimony, I can tell anyone who's going through this battle you don't have to be alone.
