ZittNet provides a wide range of low cost, low power, appropriate computing solutions optimised for individuals, businesses and institutions in rural Nigeria including:

- Wireless internet access
- Sales of low-power desktop/laptop computers & servers
- Consultancy & site surveys
- Design & supply of solar power systems
- Implementation of local networking systems
- Long-distance Wifi networking
- Voice over Internet Protocol (VOIP)
- Ubuntu Linux computing environments

Fantsuam Foundation uses Inveneo solutions because they are built to last and designed to work anywhere. Heat, dust, and virus-resistant, Inveneo solutions—along with our expert design, installation and support—provide a complete and sustainable computing system tailored for you.

Inveneo designs computers to run in power-poor environments combining maximum processing speed with minimal power usage.
