

# The Urban Range Double Hung Window

**CAPRAL**  
ALUMINIUM

**urban**

Double hung windows are clean in appearance and suitable for heritage or modern construction. They are available in a number of frame sizes and can be configured into multiple units. Sound in both structural and water performance, they are suitable for all types of design. As both top and bottom sashes are operational this design lends itself to excellent ventilation. Plus the added ability to use performance glass, makes it a good all round thermally efficient window.

## The Urban Double Hung Window

The Urban Double Hung Window is designed around delivering a clean, flat appearance which blends easily with a range of architectural styles. Standard features such as full width integrated finger pulls on the upper and lower sashes aid ease of operation and avoid interfering with curtains or other internal window treatments. Both standard and key lockable cam latches are also available.

Being part of the Capral Urban residential range, it can be integrated with a complementary selection of sliding, casement and awning windows to provide a total window solution.
