hone
products &
services to
reach the
broadest
audiences
possible

Modern science has us living longer, surviving diseases, disorders, and accidents.

We are uncovering more nuances of normal development, developmental disabilities, and aging

There are increasing numbers of vibrant, viable individuals with special needs who desire to grow and reach their potentials

Adapting learning tools and technologies allows more individuals with different learning and processing abilities thrive

Teresa M. Signorelli, PhD, CCC-SLP

is bilingual speech-language pathologist and human development specialist. She is the Director of the Smadbeck Communication and Learning Center and the Neurodevelopment and Rehabilitation Laboratory in the Communication Sciences and Disorders Department at Marymount Manhattan College.

Her work regards how the brain changes through normal development, in response to disorder or injury, and following cognitive-linguistic, motor-speech, and related therapies. Her research is published and she presents at conferences internationally.
