## CURVED SHAFT TRIMMERS

### BENEFITS OF CURVED SHAFTS

Curved shaft trimmers can be considered easier to manoeuvre and more comfortable to use by homeowners. These trimmers are lighter and weigh less than a straight shaft trimmer. In addition, many homeowners find the shorter length of a curved shaft trimmer is more convenient and useful for them to operate.

## STRAIGHT SHAFT BRUSHCUTTERS

### BENEFITS OF STRAIGHT SHAFTS

Straight shaft brushcutters are the choice of lawn care professionals and large property owners. They manage heavier brush and thicker weeds better than curved shaft models. Straight shaft brushcutters have more reach and some can interchange cutting attachments like metal blades to offer enhanced versatility. Taller individuals enjoy the extended length of the shaft. For the avid user, bike handles are also available.
