- We are family owned and operated proudly bringing you personal service from our family to yours
- We do custom orders

Technology Brings Digital Memories To Life™

Be the first to offer QR Memorials which is a Quick Response (QR) code. This symbol can be read by a special program on your smartphone which extracts a web reference (URL) from the encoded black and white squares and then displays this web page in your phone's browser. You can search for "QR Reader" easily obtained from your carriers application selection. Digital codes are placed on tombstones, memorials or buildings so that anyone visiting can immediately know about the memorial. Digital Markers record history about the departed and are easily used in coordination with ancestry.com, my heritage.com and familysearch.org enabling families to share important facts and provides an everlasting memory book.
