# Home Standby - 16kW

# **Air-Cooled Gas Engine Generator Sets**

Continuous Standby Power Rating — 16kW 60Hz Models: 05243 (Steel - Tan)

05244 (Aluminum - Gray)

## Whisper-Test™

Low Speed Exercise 59 dB(A) at 23 feet

### **INCLUDES:**

- Automatic Transfer
   Switch With Built-In 16-Circuit

   Emergency Load Center
- Electronic Governor
- Pre-wired External Connection Box
- Flexible Fuel Line
- Composite Mounting Pad
- Pre-wired conduits
- Natural Gas or LP Gas Operation
- UL 2200 Listed

### **FEATURES**

- □ INNOVATIVE DESIGN & PROTOTYPE TESTING are key components of GENERAC'S success in "IMPROVING POWER BY DESIGN." But it doesn't stop there. Total commitment to component testing, reliability testing, environmental testing, destruction and life testing, plus testing to applicable CSA, NEMA, EGSA, and other standards, allows you to choose GENERAC POWER SYSTEMS with the confidence that these systems will provide superior performance.
- ☐ TEST CRITERIA:
  - ✓ PROTOTYPE TESTED
  - ✓ SYSTEM TORSIONAL TESTED
  - ✓ NEMA MG1-22 EVALUATION
  - ✓ MOTOR STARTING ABILITY

- SOLID-STATE, FREQUENCY COMPENSATED VOLTAGE REGULATION.

  This state-of-the-art power maximizing regulation system is standard on all Generac models. It provides optimized FAST RESPONSE to changing load conditions and MAXIMUM MOTOR STARTING CAPABILITY by electronically torque-matching the surge loads to the engine.
- SINGLE SOURCE SERVICE RESPONSE from Generac's dealer network provides parts and service know-how for the entire unit, from the engine to the smallest electronic component. You are never on your own when you own a GENERAC POWER SYSTEM.
- ☐ GENERAC TRANSFER SWITCHES. Long life and reliability are synonymous with GENERAC POWER SYSTEMS. One reason for this confidence is that the GENERAC product line includes its own transfer systems and controls for total system compatibility.

# HOME STANDBY SPECIFICATIONS

		1
ENGINE	•Generac (OHVI) Design	Maximizes engine "breathing" for increased fuel efficiency. Cylinder walls run cooler, reducing oil consumption. Because heat is the primary cause of engine wear, the OHVI has a significantly longer life than competitive engines.
	•"Spiny-lok" cast iron cylinder walls	Rigid construction and added durability provide long engine life.
	•Electronic ignition, spark advance and compression release	These features combine to assure smooth, quick starting every time.
ш	•Full pressure lubrication system	Superior lubrication to all vital bearings means better performance, less maintenance and significantly longer engine life.
	•Low oil pressure shutdown system	Superior shutdown protection prevents catastrophic engine damage due to low oil.
	•High temperature shutdown	Prevents damage due to overheating.
	•Revolving field	Allows for smaller, light weight unit that operates 25% more efficiently than a revolving armature generator.
GENERATOR	•Skewed stator	Produces a smooth output waveform for compatibility with electronic equipment.
	•Displaced phase excitation	Maximizes motor starting capability. Provides more surge capability than brushless generator designs.
	•Automatic voltage regulation	Regulates the output voltage to ±2% prevents damaging voltage spikes.
	•UL 2200 Listed	For your safety
H H	•Fully Automatic	Transfers your vital electrical loads to the energized source of power.
TRANSFER SWITCH	•Remote Mounting	Mounts near your existing distribution panel for simple, low cost installation.
SV	•UL Listed	For your safety
	•Manual/Auto/Off switch	Selects the operating mode.
TRO	•Utility voltage sensing	Constantly monitors utility voltage, setpoints 60% dropout, 70% pick-up, of standard voltage.
CON	•Utility interrupt delay	Prevents nuisance start-ups of the engine, set point approximately 10 seconds.
SOR	•Engine warm-up	Ensures engine is ready to assume the load, setpoint approximately 10 seconds.
CES	•Engine cool-down	Allows engine to cool prior to shutdown, setpoint approximately 1 minute.
PRO	•Seven day exerciser	Operates engine to prevent oil seal drying and damage between power outages.
MICROPROCESSOR CONTROL	•Timed Trickle Battery charger	Maintains battery amperage to insure starting.
Ē	•Main Line Circuit Breaker	Protects generator from overload.
Ŀ	•Weather protective enclosure	Ensures protection against mother nature. Hinged key locking roof panel for security.  Lift-out front for easy access to all routine maintenance items. Electrostatically applied textured epoxy paint for added durability. Aluminum enclosure available - (Model 05244)
LINU	•Enclosed critical grade muffler	Quiet, critical grade muffler is mounted inside the unit to prevent injuries.
	•Small, compact, attractive	Makes for an easy, eye appealing installation.
Z	Pre-wired External Connection Box	Easy Installation - Virtually all hardware included, plus step-by-step photographed Installation Guide.
INSTALLATION SYSTEM	Flexible Fuel Line     Composite Mounting Pad	
	Pre-wired conduits	
INST	•UL Listed wire nuts	

GENERATOR	Model 05243 - Steel, Model 05244 - Aluminum
Rated Maximum Continuous Power Capacity (LP)	16 000 Watts*
Rated Maximum Continuous Power Capacity (NG)	
Rated Voltage	
Rated Maximum Continuous Load Current	
120 Volts	133.3 LP/125 NG
240 Volts	
Main Line Circuit Breaker	
Phase	· ·
Number of Rotor Poles	2
Rated AC Frequency	60Hz
Power Factor	
Battery Requirement (not included) Group 26,	, 12 Volt Netgative Ground and 525 Cold-cranking Amperes Minimum
Unit Weight	
Dimensions (L" x W" x H")	
Sound output in dB(A) at 23 ft. with generator operating at full load	71.5
Sound output in dB(A) at 23 ft. with generator in WhisperTest™ exercise mode	59
ENGINE	Model 05243 - Steel, Model 05244 - Aluminum
Type of Engine	GENERAC OHVI V-TWIN
Number of Cylinders	2
Rated Horsepower	30 @ 3,600 rpm
Displacement	992cc
Cylinder Block	Aluminum w/Cast Iron Sleeve
Valve Arrangement	Overhead Valve
Ignition System	Solid-state w/Magneto
Governor System	Electronic
Compression Ratio	9.5:1
Starter	
Oil Capacity Including Filter	
Standby Operating RPM	·
Exercise RPM	
Fuel Consumption	
Natural Gas cu.ft./hr.	470
1/2 Load	173
Full Load	245
Liquid Propane ft³/hr (gal/hr)	EO (4 EO)
1/2 Load	59 (1.59)
Full Load	92 (2.51)
Required fuel pressure to generator fuel inlet at all load ranges - 5 to 7 inches of water co	Dlumn for natural gas, 10 to 12 inches of water column for LP gas
CONTROLS

Rating definitions - Standby: Applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. (All ratings in accordance with BS5514, ISO3046 and DIN6271). \* Maximum wattage and current are subject to and limited by such factors as fuel Btu content, ambient temperature, altitude, engine power and condition, etc. Maximum power decreases about 3.5 percent for each 1,000 feet above sea level; and also will decrease about 1 percent for each 12° C (10° F) above 15.5° C (60°F).

TRANSFER SWITCH & EMERGENCY LOAD CENTER	Models: 05243 & 05244

### **Transfer Switch Features**

- Electrically operated, mechanically-held contacts for fast, positive connections.
- Rated for all classes of load, 100% equipment rated, both inductive and resistive.
- 2 pole, 250 VAC contactors.
- 160 millisecond transfer time.
- Dual coil design.
- Main contacts are silver plated or silver alloy to resist welding and sticking.
- Nema 1 enclosure is standard on the 100 amp switch.
