JOB #	**201955**
JOB TITLE	**Solution Architect, Software** – **Financial Services focused**
JOB LOCATION	Vancouver, BC or Toronto, ON
SALARY	$110-$133K salary plus a strong results-driven bonus program and employee benefits
ABOUT THE COMPANY	Our company is a rapidly growing, award winning software development firm, with a particular focus and expertise on creating unique financial software platforms. Our leadership group is big on technology and creativity, and believe that teamwork is the key to reaching amazing feats. This role is ideally based out of our Vancouver office, or can be based in Toronto
JOB DESCRIPTION	We're on the lookout for an exceptionally talented **Software Solution Architect** who is passionate about banking technology. If you aren't afraid to push the envelope or get your hands dirty, keep reading! You will be part of the technical team in which you will fulfill a leading role only gained by excellent performance. Talking highly specific technical details as well as discussing general business outcomes, you comfortably translate customer requirements into a distinguished design. You dedicate yourself to security, deployment, performance, caching, sizing, scalability and serviceability. By creating structure and clear explanations, you provide guidance and oversight to your team. Also part of the job is creating technical architecture documentation; working with the QA lead to define the test strategy; leading DevOps to define and implement CI/CD pipelines and ensuring that implementations meet non-functional requirements. You have excellent communication skills and are able to translate complex business ideas into simplified technology outcomes. You are able to facilitate conversations, providing training and lead workshops when needed. Part of the job may require spending time on-site with customer teams throughout the various phases of the project.
CANDIDATE COMPETENCIES	**We will be happy if you:** • Have created solutions for **financial services (especially banking)** • Have experience with Portal/Web Content Management • Are familiar with architectural patterns, such as Microservices, CQRS, event sourcing • Have experience with server virtualization and containers technology such as Docker, VMWare and HyperV • Have professionally used Integration Platforms, API Gateway, etc. • Have experience with Reactive Programming or Functional Programming **Key Skills and Experience Required** • Your knowledge of the Java platform exceeds our expectations • Experienced in Spring, Maven, Jenkins

CANDIDATE 'FIT'	• You have a good working knowledge of the Microsoft .Net framework • You have an excellent understanding of Service Oriented Architectures (SOA), as well as Microservices Architecture • JavaScript frameworks, MVC patterns and principles of REST APIs, ideally including RAML and/or OpenAPI, are second nature to you • When we ask you about architectural frameworks, you easily dig up your knowledge and best practices • You have professionally worked with Enterprise Integration Patterns and Frameworks • You have a deep understanding of Cloud application and infrastructure principles and are familiar with AWS or Azure • And let's not forget your broad, operational knowledge of application servers, databases, load balancers and other infrastructure components required to deploy web applications in a highly available and scalable environment • And…….you have excellent English communication & presentation skills **Soft Skills** • Excellent communicator in English. Fluency in French would be an asset. • Ability to learn fast (like, really fast) and ready to make a big impact • 'Agile savvy' - You understand what it means to be a consultant • Reliable and have a positive attitude • Great interpersonal skills (aka clients love you!) • Ability to handle working on multiple projects / tasks & keep them all under control • Passionate about technology and using it to help solve business issues • Strong analytical and problem-solving skills • Making recommendations from a development perspective for practical solutions, time estimates and overall feasibility means being comfortable standing your ground
HOW TO APPLY	Please email your resume (cover letter optional) to info@philiprecruitment.com *We thank all applicants for their interest, however, only those selected for an interview will be contacted.* *If this is not the right time or role for you, but you suspect it could be a great opportunity for a qualified candidate, feel free to forward this information to them and have them contact us directly.*
