

Dr. Kates and Dr Franz reads the lines for Dr. Katz.

DR. KATES (CONT'D)

I'm going to give you something to help take the edge off, Celexa, a small dose to start with. Meanwhile I want you to follow up with a Dr. Nancy Frane, she's really good at getting to the root of any issues related to past trauma.

He rips the paper off and hands it to Darius who looks at it.

DARIUS

This ain't gonna have me all spaced out is it?

DR. KATES

No, like I said it's a small dose until we can see what works best.

SHANTELL

Is this something that will eventually go away?

DR. KATES

It's hard to say, but going by what you told me about your family history, it's probably something that you are going to be dealing with for the long haul, but it is manageable.

The couple stands up.

DARIUS

Thanks Dr. Kates

DR. KATES

(shaking Darius's hand)
Not a problem, and make sure you follow up with Dr. Frane.
