

25 Things We Love About Our Neighborhood:

1

FREE FERTILIZER

Watching horses graze in neighborhood pastures is a treat in and of itself — heck, the fact that our urban neighborhood even has pastures is pretty incredible — but an added bonus is the crap they leave behind. Every spring, a sign appears at White Rock Stables along Goforth and Lanshire offering free compost to anyone who wants to fertilize their gardens. All you have to do is back in your pick-up and shovel the manure into your bed. It might be a while before you can drive with the windows down, but your spring flowers will smell delightful.
