

Begin — Buyers Add Your Items to the PayPal Shopping Cart

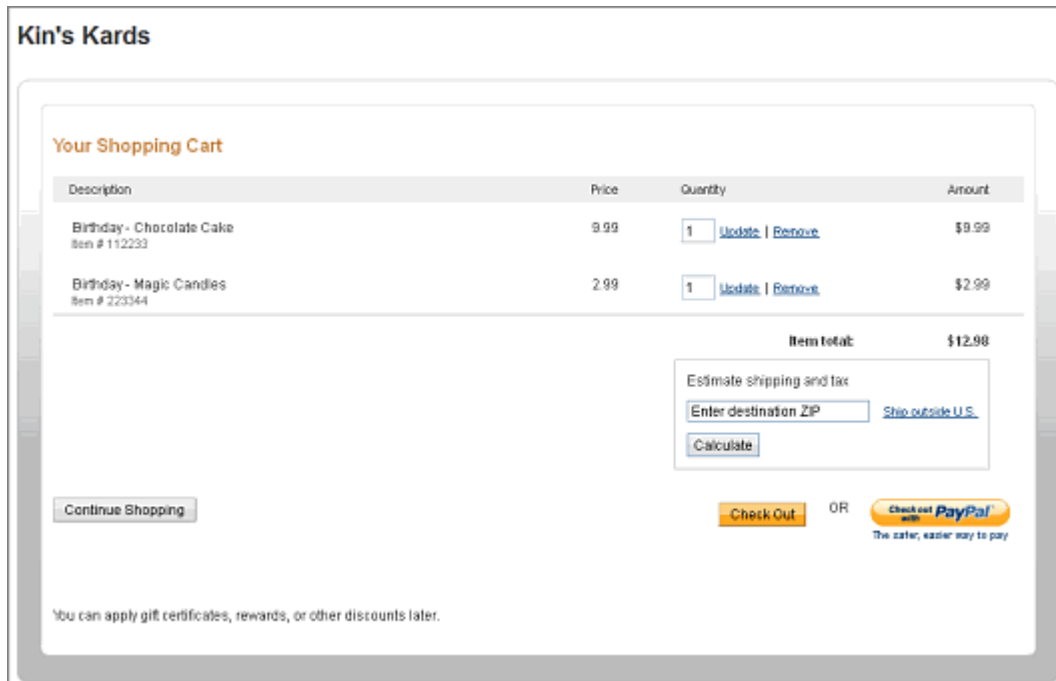

The basic checkout experience with the PayPal Shopping Cart begins when someone on your website adds your items to the cart and then views it to check out.

The screenshot shows the Kin's Kards website interface. At the top, the site name "Kin's Kards" is displayed on the left, and a "View Cart" button is on the right. Below the site name is a navigation menu with links for "Birthday", "Anniversary", "Graduation", "Sympathy", "Get Well", and "Contact Us". The main content area is titled "Birthday Cards" and features six different card designs arranged in a 2x3 grid. Each card has a price listed below it and an "Add to Cart" button. The cards and their prices are: 1. Candles on a cake: \$2.99 USD; 2. Pink birthday cake: \$3.99 USD; 3. Chocolate cake with candles: \$9.99 USD; 4. Red birthday cake with "You still get the moves!": \$4.99 USD; 5. Party on! with balloons: \$1.99 USD; 6. Clown with balloons: \$1.99 USD. At the bottom of the page, there is a text block: "Kin makes it easy to pay. Pay with credit cards and debits cards, or use your PayPal account.*Prices include tax and shipping."

In this example, Steve begins on Kin's Kards website, looking for birthday cards. Steve clicks the **Add to Cart** buttons under two cards that he wants. Then, he clicks the **View Cart** button to review his selections.

PayPal displays a shopping cart page, which allows buyers to review their selections, specify quantities, and remove items before proceeding to check out. If you set up shipping rates in your account profile, a shipping calculator displays at the bottom of the cart. When the buyers enter their zip codes, the shipping calculator determines the shipping amount and adds it to the total. If your account has sales tax associated with that zip code, the calculator also determines the tax amount and adds it to the total. If the buyer changes the zip code, the calculator uses the new zip code to recalculate the shipping and tax amounts.

In this case, Steve is satisfied with his selections and the transaction amount. He clicks the **Check Out** button.

1 — Buyers Enter Their Billing Information or They Log In To PayPal

PayPal displays a billing information/log-in page, which presents buyers with the choice of how to pay: Either entering their credit card/ debit card information or logging into PayPal.

In this case, Steve is satisfied with the total transaction amount of \$14.28 USD. He enters his billing and contact information, and completes his order.

2 — Buyers View and Print Their PayPal Payment Confirmations

PayPal displays a payment confirmation page after buyers pay to allow them to know that they have completed their transactions and authorized their payments successfully.
