

CORNERSTONE COLLABORATIVE FLORIDA

FLORIDA MOBILE HEALTH

Predictive Health Diagnostics, Inc. was formed to commercialize intellectual property developed by Dr. Douglas Harrington related to cardiovascular disease, the Protein Unstable Lesion Signature (PULS) Cardiac Test. The PULS Cardiac Test measures protein biomarkers in the blood that indicate coronary artery plaque deposits at risk of rupture. The PULS Cardiac Test identifies patients at high-risk for heart attack undetectable using other tests. The PULS Cardiac Test technology has undergone extensive scrutiny by US government regulators, and the National Institute of Health.

“HeartThrob” Initiative with Predictive Health Diagnostics

AUGUST 2018

Cornerstone Collaborative Florida, Inc. (CCF) has launched an initiative to work with Predictive Health Diagnostics and with accredited academic institutions to strengthen the preparation and availability of skilled healthcare workforce in underserved Florida communities.

Through its “HeartThrob” Initiative, CCF aims to:

1. Provide meaningful pathways for healthcare workforce development.
2. Deliver innovative mobile healthcare screening.
3. Lower the incidents of cardiac disease, the leading cause of mortality in the U.S.
4. Capture data on chronic health and healthcare utilization.
5. Leverage engagement with underserved populations to define policy and direct resources.

Improving Community Health

~
www.cornercollab.org
www.PULStest.com

Direct community outreach through this mobile health initiative will enable Cornerstone and its collaborating organizations to convene a coalition of community stakeholders to:

1. Address community health needs related to heart disease.
2. Strengthen public health workforce capacity.
3. Provide access to healthcare screening within Florida communities.

The Collaborative aims to strengthen the healthcare workforce capacity by working with academic institutions in Florida including, but not limited to; Keiser University, Florida Career College, Broward College, Florida Atlantic University, Lynn University, University of Florida, Bethune-Cookman College, University of Central Florida, University of South Florida, Florida A&M University, University of Miami, and others.

The Collaborative has begun dialogue to work with community stakeholders such as Omega Psi Phi Fraternity, the YMCA, Urban League, and United Way to improve cardiac health outcomes and address health disparities for all Floridians.
