

# why you should help keep the office clean...

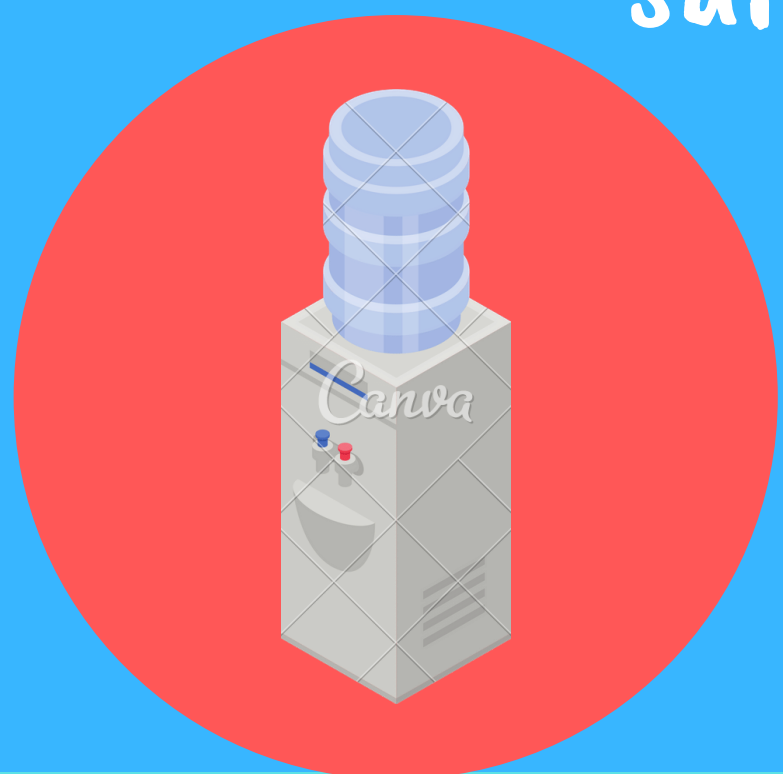

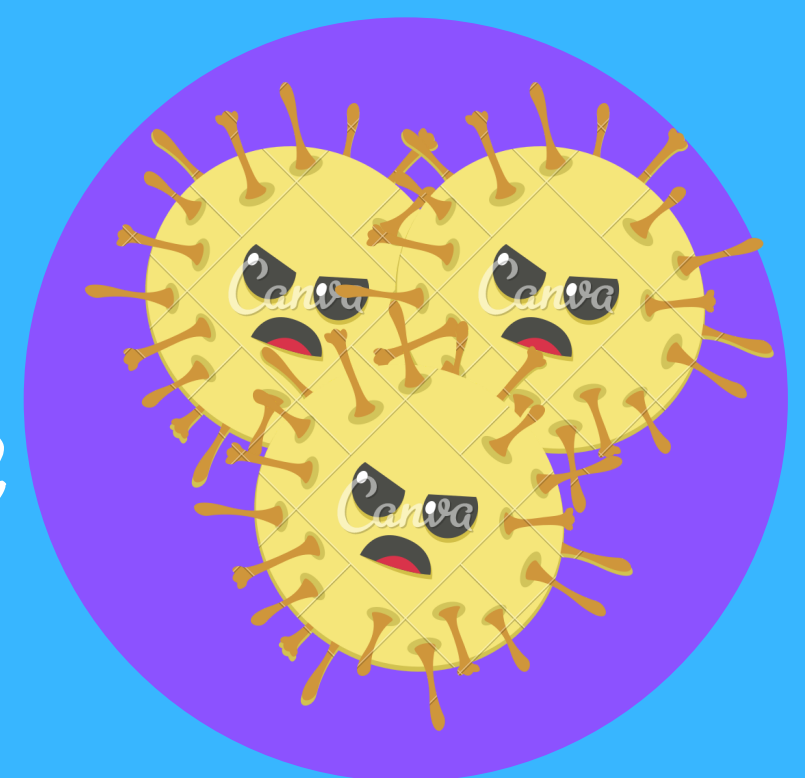

Most office keyboards are **400 TIMES** dirtier than a toilet seat.

Your desk contains **100 TIMES** more bacteria than a kitchen worktop.

Your telephone is covered in around **25,000 GERMS** per square inch.

Adults touch their face **15.7 times** on average per hour transmitting germs to the surfaces they touch.

**25%** of water cooler buttons are considered a serious risk for illness transmission.
